

MIDWIFERY

LEVEL III

TVET CURRICULUM

Based on Dec 2021 Version III
Occupational Standard (OS)

January 2022
Addis Ababa

Preface

The reformed TVET-System is an outcome-based system. It utilizes the needs of the labor market and occupational requirements from the world of work as the benchmark and standard for TVET delivery. The requirements from the world of work are analyzed and documented – taking into account international benchmarking – as occupational standards (OS).

In the reformed TVET-System, curricula and curriculum development play an important role with regard to quality driven TVET-Delivery. Curricula help to facilitate the learning process in a way, that trainees acquire the set of occupational competences (skills, knowledge and attitude) required at the working place and defined in the occupational standards (OS). Responsibility for Curriculum Development will be given to the Regional TVET-Authorities and TVET-Providers.

This curriculum has been developed by a group of experts from different Regional TVET-Authorities based on the occupational standard for midwifery level III. It has the character of a model curriculum and is an example on how to transform the occupational requirements as defined in the respective occupational standard into an adequate curriculum.

The curriculum development process has been actively supported and facilitated by the Ministry of **Labor and Skill** and **Ministry of Health**.

TVET-Program Design

1.1.TVET-Program Title: Midwifery Level III

1.2.TVET-Program Description

The Program is designed to develop the necessary knowledge, skills and attitude of the learners to the standard required by the occupation. The contents of this program are in line with the occupational standard. Learners who successfully completed the Program will be qualified to work as a **Midwife level III** with competencies elaborated in the respective OS. Graduates of the program will have the required qualification to work in the **Health sector** in the field of **Midwifery**

The prime objective of this training program is to equip the learners with the identified competences specified in the OS. Graduates are therefore expected to Provide Motivated Competent and Compassionate service, Apply Computer and Mobile Health Technology, Apply Infection Prevention Techniques and Workplace OHS, Perform Community Mobilization and Provide Health Education, Provide First Aid and Emergency Response, Provide Adolescent Youth and Reproductive Health service, Provide Range Of Medication Relating Midwifery Practice, Promote and Provide Immunization and Manage Cold Chain, Manage maternal Nutritional Problems and provide preconception care, Provide Common Medical and Surgical Care in Maternal Health service, Apply Basic Health Statistics and survey, Apply 5S Procedures, Promote and Provide Family Planning Service, Provide and Manage Care during Pregnancy, Provide and Manage Care during Labor and Birth, Provide and Manage Postpartum Care for Mother and Neonate, Provide and Manage Care for newborn &Children, Provide and Manage Care for Clients with Gynecological Problems, Manage Community Health Service, Prevent and Eliminate, MUDA using problem Solving Tools in accordance with the performance criteria described in the OS.

1.3. TVET-Program Learning Outcomes

The expected outputs of this program are the acquisition and implementation of the following units of competence

HLT MDW3 01 0721 Provide Motivated Competent and Compassionate service

HLT MDW3 02 0721 Apply Computer and Mobile Health Technology

HLT MDW3 03 0721 Apply Infection Prevention Techniques and Workplace OHS

HLT MDW3 04 0721 Perform Community Mobilization and Provide Health Education

HLT MDW3 05 0721 Provide First Aid and Emergency Response

HLT MDW3 06 0721 Provide Adolescent, Youth and Reproductive Health service

HLT MDW3 10 0721 Provide Common Medical and Surgical Care in Maternal Health service

HLT MDW3 07 0721 Provide Range Of Medication Relating Midwifery Practice

HLT MDW3 08 0721 Promote and Provide Immunization and Manage Cold Chain

HLT MDW3 09 0721 Manage maternal Nutritional Problems and provide preconception care

HLT MDW3 11 0721 Apply Basic Health Statistics and survey

HLT MDW3 12 0721 Apply 5S Procedures

1.4. Duration of the TVET-Program

The Program will have duration of **1792 hours** including the on-the-job practice or cooperative training time.

s.no	Unit competency	On school training		Cooperative training	Total hours	Remarks
		Theory	Practical			
1.	Provide Motivated Competent and Compassionate service	40	—	—	40	Co-operative training is applied together with all unit of competencies
2.	Apply Computer and Mobile Health Technology	44	56	—	100	
3.	Apply Infection Prevention Techniques and Workplace OHS	32	24	40	96	
4.	Perform Community Mobilization and Provide Health Education	60		60	120	
5.	Provide First Aid and Emergency Response	40	50	50	140	
6.	Provide Adolescent, Youth and Reproductive Health service	40	8	80	128	
7.	Provide Common Medical and Surgical Care in Maternal Health service.	130	100	240	470	3 weeks Medical 3 weeks Surgical
8.	Provide Range Of Medication Relating Midwifery Practice	52	40	130	222	
9.	Promote and Provide Immunization and	40	30	160	230	

	Manage Cold Chain					
10.	Manage maternal Nutritional Problems and provide preconception care	50	4	80	134	
11.	Apply Basic Health Statistics and survey	40		40	80	
12.	Apply 5S Procedures	16	8	8	32	
Total		584	320	888	1792	

1.5. Qualification Level and Certification

Based on the descriptors elaborated on the Ethiopian National TVET Qualification Framework (NTQF) the qualification of this specific TVET Program is “**Level III**”.

The learner will not be awarded any certificate before completion of all the modules in the health sector training.

1.6. Target Groups

Any citizen **without disability** who meets the entry requirements under items 1.7 and capable of participating in the learning activities is entitled to take part in the Program.

1.7 Entry Requirements

The prospective participants of this program are required to possess the requirements or directive of the Ministry of Labor and Skill.

1.8 Mode of Delivery

This TVET-Program is characterized as a formal Program on middle level technical skills. The mode of delivery is co-operative training. The TVET-institution and identified companies have forged an agreement to co-operate with regard to implementation of this program. The time spent by the trainees in the industry will give them enough exposure to the actual world of work and enable them to get hands-on experience.

The co-operative approach will be supported with school-based lecture-discussion, simulation and actual practice. These modalities will be utilized before the trainees are exposed to the industry environment.

.

1.9. TVET-Program Structure

Unit of Competence	Sequences of Learning modules		Unit title	Duration (In Hours)
	Code	Title/ For Module name		
HLT MDW3 01 1221 Provide motivated, competent, and Compassionate Caring Service	HLT MDW3 M01 1221	Providing motivated, competent, and Compassionate Caring Service	- Professionalism and ethical practice - Apply humanistic care to clients - Effective health care communication - Respectful care for clients - Performing with legal and ethical framework - Providing motivated and competent service	40hr
HLT MDW3 12 1221 Apply Computer and Mobile Technology	HLT MDW3 M02 0122	Applying Computer and Mobile Technology	- Starting computer, system information and features. - Navigation and manipulation of desktop environment. - Existing Health technologies. - Functions of technology. - Evaluation of new or upgraded technology performance	40hrs

<u>HLT MDW3 02 1221</u>	Apply Infection Prevention Techniques and Workplace OHS	<u>HLT MDW3 M03 0122</u>	Applying Infection Prevention Techniques and Workplace OHS	• Causes of Disease • Infection prevention techniques • Cleaning of environmental surfaces • Limiting Contamination • Cleaning environmental surfaces • Assessment and Control of Risk and Hazard • Establishment and Maintenance of Participative Measures	96hr
<u>HLT MDW3 11 1121</u>	Perform community mobilization and health education	<u>HLT MDW3 M12 0122</u>	Performing community mobilization and health education	• Health education and communication • Training of model families • Planning and Undertaking advocacy on identified health issues	120hrs

<u>HLT MDW3 03 1221</u>	Provide Basic First Aid and Emergency response	<u>HLT MDW3 M11 0122</u>	Providing Basic First Aid and Emergency response	• Assessment and identification of client's condition • first aid service • Preparation, evaluation and action in an emergency • Communicating details of the incident • Referring client requiring further care • Evaluation of own performance	140hrs
<u>HLT MDW3 060721</u>	Provide Adolescent, Youth and Reproductive Health service	<u>HLT MDW3 M06 0122</u>	Providing Adolescent, Youth and Reproductive Health service	• Plan adolescent and youth RH services • Promote adolescent and youth RH services • Provide RH service package • Register and document RH records	128

<u>HLT MDW3 100721</u>	Provide Common Medical and Surgical Care in Maternal Health service.	<u>HLT MDW3 M07 0122</u>	Providing Common Medical and Surgical Care in Maternal Health service.	• Provide introduction on general human anatomy and physiology • Perform patient/client assessment • Apply basic patient/client care • Identify and manage common medical disorders • Identify and manage surgical problems • Identify and manage common communicable & non communicable diseases	470
<u>HLT MDW3 070721</u>	Provide Range Of Medication Relating Midwifery Practice	<u>HLT MDW3 M08 0122</u>	Providing Range Of Medication Relating Midwifery Practice	• Apply pharmacology in the field of midwifery practice • Minimize potential risk to the safe administration of medications • Prepare for administration of medications • Administer medications within the legal parameters • Respond appropriately to the signs of pain • Monitor and report	223

			client's response to administer medication.		
<u>HLT MDW3 080721</u>	Promote and Provide Immunization and Manage Cold Chain	<u>HLT MDW3 M09 0122</u>	Promoting and Providing Immunization and Manage Cold Chain	• Plan EPI activities • Promote EPI activities • Conduct immunization for children • Conduct immunization for mothers • Manage cold chain • Monitor immunization practice	230
<u>HLT MDW3 090721</u>	Manage maternal Nutritional Problems and provide preconception care	<u>HLT MDW3 M10 0122</u>	Managing maternal Nutritional Problems and provide preconception care	• Plan and undertake assessment for nutritional related health issues • Provide basic nutrition information/ education to the clients • Manage clients with nutritional problems	134

HLT MDW3 13 1221	Apply Basic Health Statistics and survey	HLT MDW3 M3 0122	Applying Basic Health Statistics and survey	• Application of health survey • Data collection • Compilation, interpretation and utilization of health data • Reports • Intervention measures	80hrs
HLT MDW3 14 1221	Apply 5S procedure	HLT MDW3 M14 0122	Apply 5S procedure	• Quality system • Sorting needed items from unneeded • Setting workplace in order • Shinning work area • Standardization of activities • Sustaining 5S system	48hrs

*The time duration (Hours) indicated for the module should include all activities in and out of the TVET institution.

1.10 Institutional Assessment

Two types of evaluation will be used in determining the extent to which learning outcomes are achieved. The specific learning outcomes are stated in the modules. In assessing them, verifiable and observable indicators and standards shall be used.

The formative assessment is incorporated in the learning modules and form part of the learning process. Formative evaluation provides the trainee with feedback regarding success or failure in attaining learning outcomes. It identifies the specific learning errors that need to be corrected, and provides reinforcement for successful performance as well. For the teacher, formative evaluation provides information for making instruction and remedial work more effective.

Summative Evaluation the other form of evaluation is given when all the modules in the program have been accomplished. It determines the extent to which competence have been achieved. And, the result of this assessment decision shall be expressed in the term ‘competent or not yet competent’.

Techniques or tools for obtaining information about trainees’ achievement include oral or written test, demonstration and on-site observation.

1.11 TVET Teachers Profile

The teachers conducting this particular TVET Program are **A Level** and have satisfactory practical experiences or equivalent qualifications.

LEARNING MODULE 01	
TVET-PROGRAMME TITLE: Midwifery- Level III	
MODULE TITLE: Providing Motivated Competent and Compassionate service	
MODULE CODE: HLT MDW3 M01 0122	
NOMINAL DURATION: 40 Hours	
MODULE DESCRIPTION: This module covers the necessary knowledge, skills and attitude required to effectively form professional duties and responsibilities with compassionate caring and respectful manner by applying basic principles of professional, ethical and legal aspects of the profession.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Apply professionalism and ethical practice principles • Apply humanistic care to clients • Demonstrate effective health care communication • Provide respectful care for clients • Function with legal and ethical framework through responsibility and accountability • Providing Quality service	
MODULE CONTENTS: Unit One:- Identifying and executing ethical principles and issues 1.1. Basic Ethical Concepts and Principles 1.1.1 Definition of Ethics 1.1.2 Principle of Health Care Ethics 1.1.3 Principles of Health Ethics for Midwifery 1.1.4 Professionalism in massage therapy 1.2. Professional code of conduct 1.3. Professional Value 1.4. Ethical values Unit 2: Apply Humanistic Care To Clients. 2.1 Concepts and Principles of CRC 2.1.1 Compassionate, respectful and caring (CRC) 2.1.2 Principles of compassionate care 2.1.3 Principles of Respectful Care 2.2 The benefits of CRC/MCC	

2.3 Understanding Patients' concern

Unit Three. Effective Health Care Communication

3.1 Proper Health Care Communication

3.1.1 Health care Communication

3.1.2 Having good communication with patients/clients helps them in three main ways.

3.1.3 Tips to establish rapport:

3.1.4 Principles of communication

3.1.5 Effective interaction in health system

3.1.6 Compassionate therapeutic instructions

3.1.7 Summary Quality of Compassionate care

3.1.8 Summary Elements of compassionate care

3.1.9 Compassion and concern for a patient

3.1.10 Non-violent communication

3.1.11 Inappropriate Ways of Non-verbal Communication

3.2 Informing, educating and counseling clients

Unit Four: Respectful care

4.1. Client's knowledge, values, beliefs and culture into the planning and Delivery care

4.2. Provide accurate information for decision making

4.3. Engaging a patient in health care for decision making

4.4. Communicating complete and unbiased information

4.5. Establishing collaboration in health care system

4.6. Patient's rights to access care Patient's bill of rights

Unit Five: Legal and ethical framework

5.1 . Legislation and Common Laws

5.2 Confidentiality of Individual's Record

5.3 Ethical Issues and Ethical Dilemma

5.4 Training for health care providers

5.5 Publicizing Patient Privacy Ethical Standards

Learning Methods:

- Interactive lecture
- Group discussion
- Demonstration
- Group assignment
- Individual assignment

Assessment Methods: Formative (50%), Summative (50%)

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning
- Skill check out
- Final written exam

Assessment Criteria

Unit One: Identifying and executing ethical principles and issues

- Explain Ethical principles and issues of the profession
- Identify and execute Professional code of conducts
- Recognize and demonstrate Professional values
- Evaluate and maintain ethical principles

Unit Two: Identifying and executing Professional code of conducts

- Describe Concepts and Principles of CRC
- Explain Principles of Compassionate, respectful and caring (CRC)
- Describe the benefits of CRC/MCC
- Identify Patients' concern

Unit Three: Effective health care communication

- Define Health care Communication
- Describe Principles of communication
- Explain Elements of compassionate care
- Describe Non-violent communication
- Explain inappropriate Ways of Non-verbal Communication
- Demonstrate Informing, educating and counseling clients

Unit Four: Respectful care for clients

- Evaluate Client's knowledge, values, beliefs and culture in the delivery of Health care
- Provide accurate information for decision making
- Explain about complete and unbiased information
- Describe Patient's rights to access care and Patient's bill of rights

Unit Five: Legal and ethical framework

- Describe Legislation and Common Laws
- Maintain Confidentiality of Individual's Record
- Identify Ethical Issues and Ethical Dilemma
- Identify, recognize and report unethical conduct

LEARNING MODULE 02	
TVET-PROGRAMME TITLE: Midwifery Level - III	
MODULE TITLE : Applying Computer and Mobile Health Technology	
MODULE CODE : HLT MDW3 M02 0122	
NOMINAL DURATION : 100 Hours	
MODULE DESCRIPTION : This module aims to provide the trainees with the knowledge, skills and right attitude required to use new or upgraded technology. The rationale behind this unit emphasizes the importance of constantly reviewing work processes, skills and techniques in order to ensure that the quality of the entire business process is maintained at the highest possible level through the appropriate application of new technology.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Start computer, system information and features. • Navigate and manipulate desktop environment. • Identify the existing Health technologies. • Apply the functions of technology. • Evaluate new or upgraded technology performance.	
MODULE CONTENTS: Unit One: Computer, system information and features 1.1. Introduction to Computer basics 1.2. Ergonomic requirements 1.3. Occupational Health and Safety (OHS) 1.4. Computer basic functions and features 1.5. Customize desktop configuration. UNIT-TWO: Installing basic computer applications 2.1. Installing basic computer applications 2.2. Computer Software Installation. Unit Three: The existing Health technologies 3.1. Computer operating systems 3.2. Operating System Components 3.3 Responsibilities of operating system Unit Four: the functions of technology	

4.1. Mobile/Smart phones and tablets

4.2. Functions of technology

Unit Five: Evaluate new or upgraded technology performance

5.1. Features of new or upgraded equipment

5.2. Environmental considerations

5.3. Sources of information

5.4. Feedback

Learning Methods:

- Interactive lecture
- Group discussion
- Demonstration
- Group assignment
- Individual assignment

Assessment Methods: Formative (50%), Summative (50%)

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning
- Skill check out
- Final written exam

ASSESSMENT CRITERIA;

Unit One: Computer, system information and features

- Describe Computer basics
- Explain ergonomic requirements
- Occupational Health and Safety (OHS)
- Describe computer basic functions and features
- Customize desktop configuration.

UNIT-TWO: Installing basic computer applications

- Describe about installing basic computer applications
- Implement Computer Software Installation.

Unit Three: The existing Health technologies

- Understand computer operating systems
- Explain operating System Components
- Categorize responsibilities of operating system

Unit Four: the functions of technology

- Elaborate Mobile/Smart phones and tablets
- Explain Functions of technology

Unit Five: Evaluate new or upgraded technology performance

- Describe features of new or upgraded equipment
- Environmental considerations
- Identify sources of information Feedback

LEARNING MODULE -03	
TVET-PROGRAMME TITLE: Midwifery Level III	
MODULE TITLE: Applying Infection Prevention Techniques and Workplace OHS	
MODULE CODE: HLT MDW3 M03 0122	
NOMINAL DURATION: 96 Hours	
MODULE DESCRIPTION: This module aims to provide the trainees with the knowledge, skill and right attitude required for health workers to comply with infection control policies and procedures. All procedures must be carried out in accordance with current infection control guidelines to ensure the workplace is safe and with out risk to the health of employees, clients and/or visitors.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Identify Causes of Disease • Apply infection prevention techniques • Limit Contamination • Clean environmental surfaces • Assess and Control Risk and Hazard Establish and Maintain Participative Measures	
MODULE CONTENTS: Unit one: Causes of Diseases 1.2 Definition of terms 1.3 Causes of infection 1.4 Infection cycle/chain Unit Two: Infection prevention techniques 2.1 Essential elements of infection prevention 2.2 Standard precaution 2.3 Transmission Based Precaution 2.4 Cleaning 2.5 Infectious waste management 2.6 Personal protective equipment (PPE) 2.7 Demonstrate Hand washing	

Unit Three: Limiting Contamination

- 3.1. Demarcating and maintaining clean and contaminated zones
- 3.2. Keeping records, materials and medicaments in a clean zone
- 3.3. Keeping contaminated instruments and equipment in contaminated zone

Unit Four: Cleaning environmental surfaces

- 4.1. Definitions of Key Terms
- 4.2. General Principles for Cleaning
- 4.3. Wearing Personal protective equipment (PPE)
- 4.4. Removing dust, dirt and physical debris from work surfaces
- 4.5. 4.5. Cleaning work surfaces
- 4.6. 4.6. Drying work surfaces
- 4.7. 4.7 Replacing surface covers
- 4.8. 4.8. Maintaining and storing equipment

Unit Five: Assessing and Controlling of Risk and Hazard

- 5.1. Organizational procedures for hazard identification and control of risks.
- 5.2. Identification of all hazards at the planning, design and evaluation stages
- 5.3. Developing and maintaining hazard risk control measures
- 5.4. Identifying inadequacies in existing risk control measures
- 5.5. Protocols for care following exposure to blood or other body fluids

Unit Six: Establishing and Maintaining Participative Measures

- 6.1. Participative processes in accordance OHS legislation, regulations, and standards
- 6.2. Participative arrangement
- 6.3. Dealing with Issues of participation and consultation
- 6.4. Dealing with Issue with Consultation
- 6.5. Employee Engagement
- 6.6. Providing Information about the outcomes of participation and consultation
- 6.7. Establish and monitoring Systems for keeping OHS records

Learning Methods:

- Interactive lecture
- Group discussion

- Demonstration
- Group assignment
- Individual assignment

Assessment Methods: Formative (50%), Summative (50%)

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning
- Skill check out
- Final written exam

Assessment Criteria

Unit One. Causes of Diseases

- Define terms associated with infection
- Describe causes of infection
- Describe Infection cycle/chain

Unit Two: Infection prevention techniques

- Determine essential elements of infection prevention
- Describe transmission Based Precaution
- Describe Cleaning
- Apply Infectious waste management
- Demonstrate wearing Personal protective equipment (PPE)

Unit Three: Limiting Contamination

- Identify clean and contaminated zones
- Keep records, materials and medicaments in a clean zone
- Keep contaminated instruments and equipment in contaminated zone

Unit Four: Cleaning environmental surfaces

- Definitions of Key Terms
- Apply general Principles for Cleaning
- Demonstrate Wearing Personal protective equipment (PPE)
- Direct Removing dust, dirt and physical debris from work surfaces
- Direct cleaning work surfaces
- Direct drying work surfaces
- Direct Replacing surface covers
- Manage Maintaining and storing equipment

Unit Five: Assessing and Controlling of Risk and Hazard

- Determine procedures for hazard identification and control of risks.
- Apply identification of all hazards at the planning, design and evaluation stages
- Apply developing and maintaining hazard risk control measures

- Identify inadequacies in existing risk control measures
- Identify protocols for care following exposure to blood or other body fluids

LEARNING MODULE 4

TVET-PROGRAMME TITLE: **Midwifery Level III**

MODULE TITLE : **Performing Community Mobilization and Providing Health Education**

MODULE CODE : **HLT MDW3 M04 0122**

NOMINAL DURATION : 120 Hours

MODULE DESCRIPTION : This Module describes the knowledge, skills and attitude required to undertake health education, advocacy and community mobilization on identified health issues.

LEARNING OUTCOMES

At the end of the module the learner will be able to

- Conduct health education and communication
- Train model families

Plan and Undertake advocacy on identified health issues

MODULE CONTENTS:

Unit One: health education and communication

1.1. Concept of health and health education

1.1.1. Introduction to Health education and Communication

1.1.2. Definition of terms

1.1.3. Concepts and principles of health education and communications

1.2. Performing assessment and identify gaps

1.2.1. Assessment techniques

1.3. Organizing community and all available resources

1.3.1. Community organizations

1.3.2. Available resources

1.4. Identifying target group

1.5. Preparing health education plan.

1.5.1. Planning health education program

1.5.2. Planning process

1.6. Designing methods and approaches of health communication

1.6.1. Health education methods

1.6.2. Health education approaches

1.6.3. Health education materials

1.6.4. Effective communication skills

1.7. Providing health education service

1.8. Monitoring of service utilization and evaluation of behavioral change

- 1.8.1. Health education models
- 1.8.2. Monitoring of service utilization
- 1.8.3. Evaluation of behavior change
- 1.9. Developing, promoting, implementing and reviewing strategies for internal and external dissemination of information
 - 1.9.1. Disseminate relevant information
 - 1.9.2. Relevant, policies and regulations
- 1.10. Maintaining work related network and relationship.
- 1.11. Approaches to meet communication needs

Unit Two: Training of model families

- 2.1. Identifying better performing households
- 2.2. Establish space and time for training
- 2.3. Identifying and collecting resources for training
- 2.4. Providing training according to MOH guidelines
- 2.5. Provide post training follow up and monitoring
- 2.6. Evaluating and certifying well performing model households

Unit Three: Undertaking advocacy on identified health issues

- 3.1. Preparing advocacy plan to address health issues
 - 3.1.1. Stages of advocacy
 - 3.1.2. Advocacy tools and approaches
 - 3.1.3. Principles of effective advocacy
- 3.2. Consult community representatives health needs and priorities
- 3.3. Identifying and consulting influential community representatives and health development armies to disseminate IEC-BCC activities
- 3.4. Planning, implementation and evaluation of advocacy and community mobilization
- 3.5. Organizing and providing continuous advocacy services in partnership with stakeholders
- 3.6. Using feedback for planning

LEARNING METHODS:

- Lecture and discussion
- Role play
- Group discussions
- Individual assignments
- Demonstration
- Field visit

ASSESSMENT METHODS:

- Written exam/test
- Questioning
- Demonstration and observation
- Direct observation of tasks(real or simulated practice) using checklist
- Review of tasks (portfolio, logbook, report, assignment...)

Assessment criteria

Unit One: health education and communication

- Describe concept of health and health education
 - ✓ Health education and Communication
 - ✓ Definition of terms
 - ✓ Concepts and principles of health education and communications
- Perform assessment and identify gaps
 - ✓ Assessment techniques
- Organize community and all available resources
 - ✓ Community organizations
 - ✓ Available resources
- Identify target group
- Prepare health education plan.
- Design methods and approaches of health communication
 - ✓ Health education methods
 - ✓ Health education approaches
 - ✓ Health education materials
 - ✓ Effective communication skills
- Provide health education service
- Explain monitoring of service utilization and evaluation of behavioral change
 - ✓ Health education models
 - ✓ Monitoring of service utilization
 - ✓ Evaluation of behavior change
- Describe on developing, promoting, implementing and reviewing strategies for internal and external dissemination of information
 - ✓ Disseminate relevant information
 - ✓ Relevant, policies and regulations

Unit Two: Training of model families

- Identify better performing households
- Establish space and time for training
- Identify and collect resources for training
- Provide training according to MOH guidelines

- Provide post training follow up and monitoring
- Evaluate and certify well performing model households

Unit Three: Undertaking advocacy on identified health issues

- Explain about preparing advocacy plan to address health issues
 - ✓ Stages of advocacy
 - ✓ Advocacy tools and approaches
 - ✓ Principles of effective advocacy
- Consult community representatives health needs and priorities
- Identify and consult influential community representatives and health development armies to disseminate IEC-BCC activities
- Plan, implement and evaluate advocacy and community mobilization
- Organize and provide continuous advocacy services in partnership with stakeholders
- Use feedback for planning

LEARNING MODULE 5	
TVET-PROGRAMME TITLE: Midwifery Level – III	
MODULE TITLE : Providing First Aid and Emergency Response	
MODULE CODE : HLT MDW3 M05 0122	
NOMINAL DURATION : 140 Hours	
MODULE DESCRIPTION : This module aims to provide the trainees with the knowledge, skills and right attitudes required to recognize and respond to life threatening emergencies using basic life support, provide first aid response, management of casualty(s), the incident and other first aiders, until the arrival of medical or other assistance.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Assess and identify client's condition • Provide first aid service • Prepare, evaluate and act in an emergency • Communicate details of the incident • Refer client requiring further care • Evaluate own performance	
MODULE CONTENTS: Unit One:- Assessing client's condition Basic concept of first aid 1.1. Definition of terms 1.2. Basic principles of first aid 1.3. Assessing and Minimizing hazards 1.4. Minimizing risk 1.5. Identifying causality 1.6. Recognizing emergency situation 1.7. Monitoring vital signs and State of consciousness 1.8. Obtaining history of the event. 1.9. Selecting, Using, Maintaining and Storing safety Equipment in emergency Unit Two: Providing first aid service 2.1. Causality level of consciousness and communication style 2.2. Clinical equipment required for client management	

2.3. Applying basic rules of ABCDE life

Unit Three: Preparing, evaluating and acting in an emergency

- 3.1. Options for action and group control strategies in cases of emergency Hazards and risks
- 3.2. Occupational health / safety policies, procedures and safe working practices
- 3.3. Removing clients and other individuals from danger
- 3.4. Assessing, evaluating, reporting and documenting potential hazards

Unit Four: Communicating Details of the incident

- 4.1. Soughing first aid assistance
- 4.2. Requesting ambulance support and medical assistance
- 4.3. Observation of casualty's condition and management activities
- 4.4. Details of casualty's physical condition, management
- 4.5. Confidentiality of records and information

Unit Five: Referring Client Requiring Further Care

- 5.1. Documenting relevant client history
- 5.2. Documentation for Referral procedure
- 5.3. Conveying appropriate information to individuals involved in referral
- 5.4. Maintaining client care confidentiality during referral

Unit Six- Evaluating own performance Feedback

- 6.1. Appropriate clinical expert feedback
- 6.2. The possible psychological impacts on rescuers.
- 6.3. Participation in debriefing and evaluation

Learning Methods:

- Interactive lecture
- Group discussion
- Demonstration
- Group assignment
- Individual assignment

Assessment Methods: Continuous 70%, Final 30%

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning

• Skill check out
Final written exam
Assessment Methods: Continuous 70%, Final 30%
• Continuous assessments (quiz, assignment, tests etc.). • Oral questioning • Skill check out • Final written exam

Assessment Criteria

Unit One:- Assess and identify client's condition Basic concept of first aid

- Define terms
- Explain basic principles of first aid
- Assessing and Minimizing hazards
- Minimizing risk
- Identify causality
- Recognize emergency situation
- Monitor vital signs and State of consciousness
- Obtain history of the event.
- Select, use, Maintain and Store safety Equipment in emergency

Unit Two: Providing first aid service

- Describe causality level of consciousness and communication style
- Identify clinical equipment required for client management
- Apply basic rules of ABCDE life

Unit Three: Preparing, evaluating and acting in an emergency

- Explain options for action and group control strategies in cases of emergency Hazards and risks
- Understand occupational health / safety policies, procedures and safe working practices
- Explain about removing clients and other individuals from danger
- Assess, evaluate, report and document potential hazards

Unit Four: Communicating Details of the incident

- Explain soothing first aid assistance
- Describe requesting ambulance support and medical assistance
- Describe observation of casualty's condition and management activities
- Explain details of casualty's physical condition, management
- Maintain confidentiality of records and information

Unit Five: Referring Client Requiring Further Care

- Document relevant client history
- Explain documentation for Referral procedure
- Convey appropriate information to individuals involved in referral
- Maintain client care confidentiality during referral

Unit Six- Evaluating own performance Feedback

- Collect clinical expert feedback
- Describe the possible psychological impacts on rescuers.
- Explain about participation in debriefing and evaluation

LEARNING MODULE 6	
TVET-PROGRAMME TITLE: Midwifery level-III	
MODULE TITLE : Providing Adolescent, Youth and Reproductive Health	
MODULE CODE : <u>HLT MDW3 M06 0122</u>	
NOMINAL DURATION: 128 hours	
MODULE DESCRIPTION: This module aims to provide the knowledge, skills and attitude required to plan, promote and provide adolescent and youth friendly reproductive health service	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Plan adolescent and youth RH services • Promote adolescent and youth RH services • Provide RH service package • Register and document RH records	
MODULE CONTENTS: Unit One: Planning adolescent and youth RH services 1.1 . Introduction to adolescent and RH 1.1.1. Definition of terms 1.1.2. History and concepts of RH 1.1.3. Components of RH 1.2. Identifying eligible and target groups for RH 1.3. Resource mapping 1.4. Developing action plan Unit Two: Promoting adolescent and youth RH services 2.1. Identifying and consulting community representatives and volunteers 2.2. Organizing education and promotion of RH services on the basis of inter- sectorial approach 2.3. Providing and sustaining RH service 2.4. Supporting RH problems in line with individual needs for changing unhealthy behavior Unit Three: Providing RH service package 3.1. Counselling Client's on symptom of RH problem, service seeking behavior and treatment compliance	

- 3.2. Diagnosing and managing sexual transmitted infections (STIs)
- 3.3. Managing Low risk conditions and referring high risk conditions to higher health facility
- 3.4. Undertaking Follow up

LO4. Register and document RH records

- 4.1. Collecting and updating RH events timely on the basis of HMIS guideline
- 4.2. Reporting and communicating RH services to the higher level
- 4.3. Revising Plan is on adolescent and youth RH health services

LEARNING METHODS:

- Lecture-discussion
- Group discussion
- Exercise
- Individual assignment
- Role play
- Video show
- Interview
- Written test
- Demonstration/Observation with oral questioning

Assessment Methods: Continuous 70%, Final 30%

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning
- Skill check out
- Final written exam

ASSESSMENT CRITERIA:

Unit One: Planning adolescent and youth RH services

- Explain history, concepts, definitions, components of RH
- Identify eligible and target groups for RH
- Conduct resource mapping using the standard format of FMOH
- Develop action plan is based on priority health need

Unit Two: Promoting adolescent and youth RH services

- Identify influential community representatives and volunteers
- Organize and promote RH service promotion and education in partnership with the community and relevant organizations on the basis of inter-sectoral approach
- Promote and educate RH service to meet community and organizational requirements on the basis of duty and responsibilities of all stakeholders
- Support RH problem to take self-care approach in line with individual needs for changing unhealthy behavior on the basis of healthy promotion and strategic behavioral change approach of FMOH

Unit Three: Providing RH service package

- Advise client's RH symptom of RH problem, service seeking behavior, and compliance on advice and treatment based on the national adolescent and youth RH guideline
- Diagnose and manage sexual transmitted infections
- Manage low risk conditions are according to the guidelines
- Refer high risk conditions to the next higher health facility according to the standard protocol
- Undertake follow up according to the SRH guideline

Unit Four: Registering and documenting RH records

- Prepare registration book for nutritional events registration according to HMIS standards of FMOH
- Collect RH events data continuously, sustained and updated timely on the basis of HMIS guideline of FMOH
- Report and communicate RH services to the higher level and relevant body on the basis of HMIS procedure of the FMOH

- Revise plan on adolescent and youth RH health services for the catchments for a specific period of time

LEARNING MODULE 7	
TVET-PROGRAMME TITLE: Midwifery Level III	
MODULE TITLE: Providing Common Medical and Surgical Care in Maternal Health	
MODULE CODE: HLT MDW3 M07 0122	
NOMINAL DURATION: 470 Hours	
MODULE DESCRIPTION: This module covers the knowledge, skills and attitude required to diagnose and manage Common medical and surgical care in Midwifery practice.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Provide introduction on general human anatomy and physiology • Perform patient/client assessment • Apply basic patient/client care • Identify and manage common medical disorders • Identify and manage surgical problems • Identify and manage common communicable & non communicable diseases	
Module Contents: Unit One: Introduction on general human anatomy and physiology 1.1. Introduction to anatomy and physiology 1.2. Describing anatomy and physiology of integumentary system 1.3. Anatomy and physiology of musculoskeletal system 1.4. Anatomy and physiology of respiratory system 1.5. Anatomy and physiology of digestive system 1.6. Anatomy and physiology of cardiovascular system 1.7. Anatomy and physiology of genitourinary system 1.8. Anatomy and physiology of endocrine system 1.9. Anatomy and physiology of nervous system 1.10. Anatomy and Physiology of head, eye, ear, nose and throat (HEENT) 1.11. Anatomy and physiology of the reproductive system Unit Two: Patient/client assessment 2.1. Taking patient /client history 2.2. Principles of physical examination 2.3. Patient/client physical examination 2.4. Measuring Vital signs 2.5 Recording patient/client data	

Unit Three: Basic patient/client care

- 3.1. Describing and demonstrating patient/client care procedures (Bed making, Catheterization, NG-tube insertion, vital sign taking, specimen collection, medication administration, body mechanics and patient transport and cold/ /heat compression.
- 3.2. Describing and performing basic patient care (oral care, pressure area care, bed bath, back care, wound care, perineal care, caring for fingernails and toe nails and hair washing.
- 3.3 Explaining correct and faulty posture in different activities
- 3.4 Caring out follow up and monitoring

Unit Four: Identifying and managing common medical disorder

- 4.1. Identifying and managing HEENT disorders
- 4.2. Identifying and managing common respiratory disorders
- 4.3. Identifying and managing cardiovascular system disorders
- 4.4. Identifying and managing digestive system disorders
- 4.5. Identifying and managing genitourinary system disorders
- 4.6. Identifying and managing endocrine system disorders
- 4.7. Identifying and managing integumentary system disorders
- 4.8. Identifying and managing nervous system disorders
- 4.9. Identifying and managing reproductive system disorders
- 4.10. Identifying and managing musculoskeletal system disorder

Unit Five: Identifying and managing surgical problems

- 5.1. Operation room techniques
- 5.2. Providing wound care
- 5.3. Providing pre, intra and post-operative care
- 5.4. Referring a patient with hernias
- 5.5. Recognizing degree of burn cases and providing care.
- 5.6. Identifying, consulting and referring a patient with acute abdomen
- 5.7. Supportive management for a patient with hemorrhoid
- 5.8. Managing acid-base, fluid and electrolyte imbalance

Unit Six: Manage common communicable & non communicable diseases

- 6.1. Diagnosing and managing common bacterial diseases
- 6.2. Identifying and managing common viral infections
- 6.3. Diagnosing and providing treatment for common fungal infections
- 6.4. Identifying and managing common protozoal infections
- 6.5. Diagnosing and managing Common parasitic infestations
- 6.6. Diagnosing and managing common non- communicable disease
- 6.7. Developmental and acquired spinal health problems
- 6.8. Prevention methods of spinal problems

LEARNING METHODS:

- Lecture-discussion
- Lecture-discussion
- Demonstration/role play
- Group discussion
- Exercise: case scenario
- Individual assignment
- Video show

Assessment methods

- Interview/oral exam
- Written test
- Demonstration/Observation

ASSESSMENT CRITERIA:

Unit One: Introduction on general human anatomy and physiology

- Describe anatomy and physiology of human body
- Describe anatomy and physiology of integumentary system
- Describe anatomy physiology of musculoskeletal system
- Describe anatomy physiology of respiratory system
- Describe anatomy physiology of digestive system
- Describe anatomy physiology of cardiovascular system
- Describe anatomy physiology of genitourinary system
- Describe anatomy and physiology of endocrine system
- Describe anatomy and physiology of nervous system
- Describe anatomy and Physiology of head, eye, ear, nose and throat (HEENT)
- Describe anatomy and physiology of the reproductive system

Unit Two: Patient/client assessment

- Take patient /client history
- Describe principles of physical examination
- Undertake patient/client physical examination
- Measure Vital signs
- Record patient/client data

Unit Three: Basic patient/client care

- Describe and demonstrate patient/client care procedures (Bed making, Catheterization, NG-tube insertion, vital sign taking, specimen collection, medication administration, body mechanics and patient transport and cold/ /heat compression.
- Describe and perform basic patient care (oral care, pressure area care, bed bath, back care, wound care, perineal care, caring for fingernails and toe nails and hair washing.
- Explain correct and faulty posture in different activities
- Carry out follow up and monitoring

Unit Four: Identifying and managing common medical disorder

- Identify and manage HEENT disorders
- Identify and manage common respiratory disorders
- Identify and manage cardiovascular system disorders
- Identify and manage digestive system disorders
- Identify and manage genitourinary system disorders
- Identify and manage endocrine system disorders
- Identify and manage integumentary system disorders
- Identify and manage nervous system disorders
- Identify and manage reproductive system disorders
- Identify and manage musculoskeletal system disorder

Unit Five: Identifying and managing surgical problems

- Operation room techniques
- Providing wound care
- Providing pre, intra and post-operative care
- Referring a patient with hernias
- Recognizing degree of burn cases and providing care.
- Identifying, consulting and referring a patient with acute abdomen
- Supportive management for a patient with hemorrhoid
- Managing acid-base, fluid and electrolyte imbalance

Unit Six: Manage common communicable & non communicable diseases

- Diagnosing and managing common bacterial diseases
- Identifying and managing common viral infections
- Diagnosing and providing treatment for common fungal infections
- Identifying and managing common protozoal infections
- Diagnosing and managing Common parasitic infestations
- Diagnosing and managing common non- communicable disease

- Describe developmental and acquired spinal health problems
- Explain prevention methods of spinal problems

LEARNING MODULE 8

TVET-PROGRAMME TITLE: MIDWIFERY LEVEL III

MODULE TITLE: **Providing Common Medical and Surgical Care in Maternal Health**

MODULE CODE: HLT MDW3 M08 0122

NOMINAL DURATION: 223Hours

MODULE DESCRIPTION: This module covers the knowledge, skills and attitude required to administer a limited range of medications in midwifery practice.

LEARNING OUTCOMES

At the end of the module the learner will be able to:

- Apply pharmacology in the field of midwifery practice
- Minimize potential risk to the safe administration of medications
- Prepare for administration of medications
- Administer medications within the legal parameters
- Respond appropriately to the signs of pain
- Monitor and report client's response to administer medication.

MODULE CONTENTS:

Unit one: Introduction on general human anatomy and physiology.

1.1. Introduction to anatomy and physiology

1.1.1. Definition of terms

1.2. Anatomy and Physiology of integumentary system

1.3. Anatomy and Physiology of Musculoskeletal System

1.4. Anatomy and Physiology of respiratory system

1.5. Anatomy and Physiology of Digestive System

1.6. Anatomy and Physiology of Cardiovascular System

1.7. Anatomy and Physiology of Genitourinary System

1.8. Anatomy and Physiology of Endocrine System

1.9. Anatomy and Physiology of Nervous System

1.10. Anatomy and Physiology of Head, Eye, Ear, Nose and Throat

Unit two: Patient/client assessment

2.1. Client history

2.2. Principles of physical examination

2.3. Complete patient/client physical examination

2.4. Vital Signs

2.5. Complete patient/client data

Unit three: Basic patient/client care

- 3.1. patient client care procedures
- 3.2. Catheterization
- 3.3. NG (Nasogastric) tube insertion
- 3.4. Medication Administration

Unit four: Managing common medical disorder

- 4.1. Identifying and Managing HEENT disorders
- 4.2. Common respiratory disorders
- 4.3. Cardiovascular System disorders
- 4.4. Digestive System disorder
- 4.5. Genitourinary System disorders
- 4.6. Endocrine system disorders
- 4.7. Integumentary System disorders
- 4.8. Nervous System disorders

Unit five: Identifying and managing surgical problems

- 5.1. Operation room techniques
- 5.2. Pre, intra and post-operative care
- 5.3. A patient with hernias
- 5.4. Degree of burn cases and care
- 5.5. A patient with acute abdomen
- 5.6. Management for a patient with hemorrhoid
- 5.7. Acid-base, fluid and electrolyte imbalance
- 5.8. Hemodynamic Assessment

Unit six: Identifying and managing common communicable and non-communicable diseases

- 6.1. Common bacterial diseases
- 6.2. Common viral infections
- 6.3. Common fungal infections
- 6.4. common parasitic infections

LEARNING METHODS:

- Lecture-discussion
- Lecture-discussion
- Demonstration/role play
- Group discussion
- Exercise: case scenario
- Individual assignment
- Video show

Assessment methods

- Interview/oral exam
- Written test

Demonstration/Observation

ASSESSMENT CRITERIA:

Unit one: Introduction on general human anatomy and physiology.

- Understand anatomy and physiology
 - ✓ Definition of terms
- Describe anatomy and Physiology of integumentary system
- Describe anatomy and Physiology of Musculoskeletal System
- Describe anatomy and Physiology of respiratory system
- Describe anatomy and Physiology of Digestive System
- Describe anatomy and Physiology of Cardiovascular System
- Describe anatomy and Physiology of Genitourinary System
- Describe anatomy and Physiology of Endocrine System
- Describe anatomy and Physiology of Nervous System
- Describe anatomy and Physiology of Head, Eye, Ear, Nose and Throat

Unit two: Patient/client assessment

- Take client history
- Describe principles of physical examination
- Complete patient/client physical examination
- Take vital Signs
- Complete patient/client data

Unit three: Basic patient/client care

- Follow patient client care procedures
- Undertake catheterization
- Undertake NG (Nasogastric) tube insertion
- Undertake medication Administration

Unit four: Managing common medical disorder

- Identify and manage HEENT disorders
- Describe common respiratory disorders
- Describe cardiovascular System disorders
- Describe digestive System disorder

- Describe genitourinary System disorders
- Describe endocrine system disorders
- Describe integumentary System disorders
- Describe nervous System disorders

L.O.5 Respond appropriately to the signs of pain

- Cause of pain is identified if possible
- Any irregular or abnormal findings are reported to concerned body.
- Allay any fears or anxiety experienced by the client.

Unit five: Identifying and managing surgical problems

- Undertake operation room techniques
- Undertake pre, intra and post-operative care
- Care a patient with hernias
- Undertake degree of burn cases and care
- Care a patient with acute abdomen
- Manage a patient with hemorrhoid
- Manage acid-base, fluid and electrolyte imbalance
- Undertake hemodynamic Assessment

LEARNING MODULE 9	
TVET-PROGRAMME TITLE: Midwifery Level III	
MODULE TITLE: Promoting and Providing Immunization and Manage Cold Chain	
MODULE CODE: HLT MDW3 M09 0122	
NOMINAL DURATION: 230 Hours	
MODULE DESCRIPTION: This unit covers the knowledge, skills and attitude required in planning, promoting and conducting immunization for women and children as well as maintaining cold chain.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Plan EPI activities • Promote EPI activities • Conduct immunization for children • Conduct immunization for mothers • Manage cold chain • Monitor immunization practice	
MODULE CONTENTS: UNIT ONE: Planning EPI activity 1.1.Immunity 1.2. Expanded program on immunization (EPI) 1.3.Identifying types OF Vaccines 1.4.Planning immunization program Unit Two: Promoting EPI Activities 2.1.Consultation of Influential community leaders and HEWs 2.2.Organizing and sustaining EPI promotion and education Unit Three: Conduct Immunization For Children 3.1.Developing schedule and communicating with stakeholders 3.2.Preparing the required EPI logistics/Materials 3.3.Conducting Immunization or Vaccine 3.4.Vaccine Preventable disease	

3.5.Missed opportunities and trace defaulters

3.6.Vaccine supply and stock management

Unit Four: Managing cold Chain

4.1. Vaccines safety

4.2.Cold chain management

4.3.Maintaining cold chain minor operational defects

Unit Five: Monitoring Immunization Practice

5.1.Documentation of immunization activities

5.2.Collecting data on immunization activities

5.3.Timely updating data on immunization activities

5.4.Monitoring immunization practice at catchment areas

5.5.Screening of mothers and children

LEARNING METHODS:

- Lecture-discussion
- Demonstration (Role play)
- Group discussion
- Exercise
- Individual assignment
- Video show

ASSESSMENT METHODS:

- Interview
- Written test
- Demonstration/Observation

ASSESSMENT CRITERIA:

UNIT ONE: Planning EPI activity

- Explain immunity
- Explain Expanded program on immunization (EPI)
- Identify types of Vaccines
- Plan immunization program

Unit Two: Promoting EPI Activities

- 2.1.Undertake consultation of Influential community leaders and HEWs
- 2.2.Organize and sustain EPI promotion and education

Unit Three: Conduct Immunization For Children

- Develop schedule and communicating with stakeholders
- Prepare the required EPI logistics/Materials
- Conduct Immunization or Vaccine
- Describe vaccine Preventable disease
- Describe missed opportunities and trace defaulters
- Manage vaccine supply and stock

Unit Four: Managing cold Chain

- Explain vaccines safety
- Describe cold chain management
- Maintain cold chain minor operational defects

Unit Five: Monitoring Immunization Practice

- Document immunization activities
- Collect data on immunization activities
- Timely update data on immunization activities
- Monitor immunization practice at catchment areas
- Screen mothers and children

LEARNING MODULE 10	
TVET-PROGRAMME TITLE: Midwifery Level III	
MODULE TITLE: Managing Nutritional Problems in Mothers and Children	
MODULE CODE: HLT MDW3 M10 0122	
NOMINAL DURATION: 134 Hours	
MODULE DESCRIPTION: This Module describes knowledge, skills and attitude required to assess, screen, identify, plan and manage nutritional problems	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Plan and undertake assessment for nutritional related health issues • Provide basic nutrition information/ education to the clients • Manage clients with nutritional problems	
MODULE CONTENTS: Unit one: Nutritional assessment for related health issues 1.1. Introduction to nutrition 1.2. National nutritional assessment protocol. 1.3. Nutritional related problems, 1.4. Nutrition indicators 1.5. Nutritional interventional plan Unit Two: Basic Nutritional Information/ Education to the Clients 2.1. Nutrition education 2.2. Nutritional educational materials and products 2.3. Nutrition Counseling 2.4. Nutrition Monitoring and Reporting Formats Unit Three: Management of clients with nutritional problems 3.1. Nutritional problems (nutritional deficiency disease) 3.2. Essential Nutrition Action (ENA) 3.3. Treatment of Low risk conditions of nutritional problem	

3.4. Treatment of high risk conditions of nutritional problem

LEARNING METHODS:

- Lecture-discussion
- Demonstration (Role play)
- Group discussion
- Exercise
- Individual assignment
- Video show

ASSESSMENT METHODS:

- Interview
- Written test
- Demonstration/Observation

ASSESSMENT CRITERIA:

Unit one: Nutritional assessment for related health issues

- Explain about nutrition
- Explain national nutritional assessment protocol.
- Describe nutritional related problems,
- Indicate nutrition indicators
- Prepare nutritional interventional plan

Unit Two: Basic Nutritional Information/ Education to the Clients

- Provide nutrition education
- Prepare nutritional educational materials and products
- Provide nutrition Counseling
- Utilize nutrition monitoring and reporting formats

Unit Three: Management of clients with nutritional problems

- Identify nutritional problems (nutritional deficiency disease)
- Explain essential Nutrition Action (ENA)
- Treat low risk conditions of nutritional problem
- Treat high risk conditions of nutritional problem

LEARNING MODULE 11	
TVET-PROGRAMME TITLE: Midwifery Level III	
MODULE TITLE : Applying Basic Health Statistics and survey	
MODULE CODE : <u>HLT MDW3 M11 0122</u>	
NOMINAL DURATION : 80 Hours	
MODULE DESCRIPTION : This module describes the knowledge, skills and attitude required to apply basic health statistics and health survey methods to improve community health related activities	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Prepare for the application of health survey • Undertake data collection • Compile, interpret and utilize health data • Prepare and submit reports • Take intervention measures accordingly	
MODULE CONTENTS: Unit One: Preparing for the application of health survey 1.1. Definitions of terms 1.2. Characteristics of health statistics 1.3. Scales of measurement 1.4. Basic principles of health statistics 1.5. Measurement of health 1.6. Basic principles of health survey Unit Two: Undertaking data collection 2.1 Introduction to data collection 2.2 Planning for data collection 2.3 Questionnaires 2.4 Training personnel on data collection 2.5 Necessary equipment/material for data collection 2.6 Informing member of community about data collection 2.7 Inviting community leaders to support data collection process	

Unit Three: Compiling, interpreting and utilizing health data

- 3.1. Introduction to Health data collection
- 3.2. selection of the method of data collection
- 3.3. Data organization
- 3.4. Data analysis
- 3.5. Data interpretation, presentation and utilization
- 3.6. Data confidentiality
- 3.7. Health data utilization

Unit Four: Preparing and submitting reports

- 4.1. Recording and reporting
- 4.2. Reporting formats
- 4.3. Reporting times
- 4.4. Health management information system/HMIS/

Unit Five: taking intervention measures accordingly

- 5.1. Discussion with key stakeholders regarding the health problems
- 5.2. Feedback
- 5.3. Making contributions to the health problem of the community

Learning Methods:

- Interactive lecture
- Group discussion
- Group assignment
- Individual assignment

Assessment Methods: Continuous 70%, Final 30%

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning
- Final written exam

Assessment Criteria

Unit One: Preparing for the application of health survey

- Define terms
- Describe characteristics of health statistics
- Explain scales of measurement
- Describe basic principles of health statistics
- Explain measurement of health
- Describe basic principles of health survey

Unit Two: Undertaking data collection

- Describe data collection
- Plan for data collection
- Prepare questionnaires
- Train personnel on data collection
- Collect necessary equipment/material for data collection
- Inform member of community about data collection
- Invite community leaders to support data collection process

Unit Three: Compiling, interpreting and utilizing health data

- Explain Health data collection
- Describe methods of data collection
- Clarify data organization
- Explain about data analysis
- Understand data interpretation, presentation and utilization
- Maintain data confidentiality
- Utilize health data

Unit Four: Preparing and submitting reports

- 4.1. Describe recording and reporting
- 4.2. Utilize reporting formats
- 4.3. Recognize reporting times
- 4.4. Describe health management information system/HMIS/

Unit Five: Taking intervention measures accordingly

- Identify and discuss with key stakeholders regarding the health problems
- Collect Feedback
- Find Solutions to the health problems of the community

LEARNING MODULE 12	
TVET-PROGRAMME TITLE: Midwifery Level III	
MODULE TITLE: Applying 5S procedures	
MODULE CODE: HLT MDW M12 0122	
NOMINAL DURATION: 40 Hours	
MODULE DESCRIPTION: This unit covers knowledge, skills and attitudes required to apply 5S procedures and other standards set by 5S in work place..	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Develop understanding of quality system • Sort needed items from unneeded • Set workplace in order • Shine work area • Standardize activities • Sustain 5S system	
MODULE CONTENTS: Unit One: Developing understanding of quality system 1.1. OHS requirements of 5s. 1.2. Purpose and elements of quality assurance (QA) system 1.3. Quality assurance procedures 1.4. Meaning and concept of kaizen 1.5. Relationship of quality system and continuous improvement 1.6. 5s system 1.7. Identifying waste (MUDA) Unit Two: Sorting needed items from unneeded 2.1. Identifying and distinguishing essential and non-essential item 2.2. method of Sorting items 2.3. Sorting items required for regulatory purposes 2.4. Placing non-essential item 2.5. Regularly checkup of items in the work area	

Unit Three: Setting workplace in order

- 3.1. Identifying location and placing each essential item
- 3.2. Regular checking of item in its location

Unit Four: Shining work area

- 4.1. Keeping the work area clean and tidy
- 4.2. Regular housekeeping activities

Unit Five: Standardizing activities

- 5.1. Procedures of Standardizing activities
- 5.2. Standardizing activities using checklists
- 5.3. Keeping work area standard

Unit Six: Sustaining 5S system

- 6.1. Sustaining clean up
- 6.2. Identifying non-compliance and taking actions
- 6.3. Inspecting work area regularly
- 6.4. Recommending improvements in the workplace

Learning Methods:

- Interactive lecture
- Group discussion
- Group assignment
- Individual assignment

Assessment Methods: Continuous 70%, Final 30%

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning
- Final written exam

ASSESSMENT CRITERIA:

Unit ONE: Developing understanding of quality system.

- OHS requirements are applied throughout the work.

- Discuss quality assurance procedures of the enterprise or organization
- Understand the relationship of quality system and continuous improvement in the workplace
- Identify and relate to workplace requirements the purpose and elements of quality assurance (QA) system
- Explain the 5S system as part of the quality assurance of the work organization

Unit Two: Sorting needed items from unneeded

- Identify all items in the work area
- Distinguish between essential and non-essential items
- Sort items to achieve deliverables and value expected by downstream and final customers
- Sort items required for regulatory or other required purposes
- Place any non-essential item in a appropriate place other than the workplace
- Regularly check that only essential items are in the work area

Unit Three: Setting workplace in order

- Identify the best location for each essential item
- Place each essential item in its assigned location
- After use immediately return each essential item to its assigned location
- Regularly check that each essential item is in its assigned location

Unit Four: Shining work area

- Keep the work area clean and tidy at all times
- Conduct regular housekeeping activities during shift
- Ensure the work area is neat, clean and tidy at both beginning and end of shift

Unit Five: Standardizing activities

- Follow procedures
- Follow checklists for activities, where available
- Keep the work area to specified standard

Unit Six: Sustaining 5S system

- Clean up after completion of job and before commencing next job or end of shift

- Identify situations where compliance to standards is unlikely and take actions specified in procedures
- Inspect work area regularly for compliance to specified standard
- Recommend improvements to lift the level of compliance in the workplace

Annex: Resource Requirements

Item No.	Category/Item	Description/ Specifications	Quantity	Recommended Ratio
A.	<i>Learning Materials</i>			
1.	TTLM	Prepare by Teacher	1	1:25
2.	Textbooks		25	1:1
3.	Reference Books		5	1:5
3.1.	Ethiopia kaizen books		5	1:5
B.	<i>Learning Facilities & Infrastructure</i>			
1.	Lecture Room	5*5m	1	1:25
2.	LCD /Projector		1	1:25
3	Laptop/PIC		1	1:25
4	Power point pointer		1	1:25
5	White board		1	1:25
C.	<i>Consumable Materials</i>			
1.	Paper For check list	A4	5rim	1:5
2	paper for shop lay out	A3	5rim	1:5
5	Color paint		5	1:1
6	thinner		canon	1:5
8	soap	Hand wash		1:1
9	Brush & broom	Plastic/ragger	25	1:1
D.	<i>Tools and Equipment's</i>			
1.	wheel brow	steel	5	1:5
2	Shovel	steel	12	1:2
3	fork	steel	12	1:2
4	Personal Protective Equipments	Standared		
5	Computer			
6	Printer			
7	Photocopy machine			
8	LCD projector			
9	Tape recorder			
10	Scanner			
11	Waste segregation box for re use	wooden	1	1:25

12	Waste segregation box for disposal	wooden	1	1:25
13	Vital sign equipment's			
14	Ambu bag			
15	Wheelchair			
16	Stretcher			
17	Backboard			
18	Collar			
19	Pelvic binder			
20	Anti-shock garment			
21	Splint			

Acknowledgement

The Ministry of Health and Ministry Labor and Skill wishes to extend thanks and appreciation to the many representatives of industry, academic and government agencies who donated their time and expertise to the development of this Model Curriculum for the TVET Program **Level III**.

The trainers who developed the curriculum
