

MIDWIFERY

LEVEL IV

TVET CURRICULUM

Based on Dec 2021 Version III Occupational Standard
(OS)

Prepared by Ministry of Labor and Skill

December, 2024

Adiss Ababa

Preface

The reformed TVET-System is an outcome-based system. It utilizes the needs of the labor market and occupational requirements from the world of work as the benchmark and standard for TVET delivery. The requirements from the world of work are analyzed and documented – taking into account international benchmarking – as occupational standards (OS).

In the reformed TVET-System, curricula and curriculum development play an important role with regard to quality driven TVET-Delivery. Curricula help to facilitate the learning process in a way, that trainees acquire the set of occupational competences (skills, knowledge and attitude) required at the working place and defined in the occupational standards (OS).

This curriculum has been developed by a group of experts from different Regional TVET-Authorities based on the occupational standard for midwifery level IV. It has the character of a model curriculum and is an example on how to transform the occupational requirements as defined in the respective occupational standard into an adequate curriculum.

The curriculum development process has been actively supported and facilitated by the Ministry of Health and Ministry of **Labor and Skill**.

TVET-Program Design

1.1. TVET-Program Title: Midwifery Level IV

1.2. TVET-Program Description

The Program is designed to develop the necessary knowledge, skills and attitude of the learners to the standard required by the occupation. The contents of this program are in line with the occupational standard. Learners who successfully completed the Program will be qualified to work as a Midwife level IV with competencies elaborated in the respective OS. Graduates of the program will have the required qualification to work in the Health sector in the field of Midwifery.

The prime objective of this training program is to equip the learners with the identified competences specified in the OS. Graduates are therefore expected to Promote and Provide Family Planning Service, Provide and Manage Care during Pregnancy, Provide and Manage Care during Labor and Birth, Provide and Manage Postpartum Care for Mother and Neonate, Provide and Manage Care for newborn & Children, Provide and Manage Care for Clients with Gynecological Problems, Manage Community Health Service, Prevent and Eliminate MUDA using problem Solving Tools in accordance with the performance criteria described in the OS.

1.3. TVET-Program Learning Outcomes

The expected outputs of this program are the acquisition and implementation of the following units of competence

HLT MDW4 01 0721 Promote and Provide Family Planning Service

HLT MDW4 02 0721 Provide and Manage Care during Pregnancy

HLT MDW4 03 0721 Provide and Manage Care during Labor and Birth

HLT MDW4 04 0721 Provide and Manage Postpartum Care for Mother and Neonate

HLT MDW4 05 0721 Provide and Manage Care for newborn & Children

HLT MDW4 06 0721 Provide and Manage Care for Clients with Gynecological Problems

HLT MDW4 07 0721 Manage Community Health Service

HLT MDW4 08 0721 Prevent and Eliminate MUDA using problem Solving Tools

1.4. Duration of the TVET-Program

The Program will have duration of **1958 hours** including the on-the-job practice or cooperative training time.

s.no	Unit competency	On school training		Cooperative training	Total hours	Remarks
		Theory	Practical			
1.	Promote and Provide Family Planning Service	48	60	120	228	
2.	Provide and Manage Care during Pregnancy	84	60	200	344	
3.	Provide and Manage Care during Labor and Birth	100	100	290	490	
4.	Provide and Manage Postpartum Care for Mother and Neonate	70	60	80	210	
5.	Provide and Manage Care for newborn &Children	104	80	100	284	
6.	Provide and Manage Care for Clients with Gynecological Problems	32	40	160	232	
7.	Manage Community Health Service	50	20	30	100	
8.	Prevent and Eliminate MUDA using problem Solving Tools	54		16	70	
	Total	542	420	996	1958	

1.5. Qualification Level and Certification

Based on the descriptors elaborated on the Ethiopian National TVET Qualification Framework (NTQF) the qualification of this specific TVET Program is “**Level IV**”.

The learner will not be awarded any certificate before completion of all the modules in the health sector training.

1.6. Target Groups

Any citizen **without disability** who meets the entry requirements under items 1.7 and capable of participating in the learning activities is entitled to take part in the Program.

1.7 Entry Requirements

The prospective participants of this program are required to possess the requirements or directive of the Ministry of Labor and Skill.

1.8 Mode of Delivery

This TVET-Program is characterized as a formal Program on middle level technical skills. The mode of delivery is co-operative training. The TVET-institution and identified companies have forged an agreement to co-operate with regard to implementation of this program. The time spent by the trainees in the industry will give them enough exposure to the actual world of work and enable them to get hands-on experience.

The co-operative approach will be supported with school-based lecture-discussion, simulation and actual practice. These modalities will be utilized before the trainees are exposed to the industry environment.

.

1.9. TVET-Program Structure

Unit of Competence		Module Code & Title		Learning Outcomes	Duration (In Hours)
<u>HLT MDW4 01 0721</u>	Promote and Provide Family Planning Service	<u>HLT MDW4 M01 1224</u>	Promoting and Providing Family Planning Service	- Describe the basics of family planning - Describe and provide family planning methods - Provide family planning counseling	228
<u>HLT MDW4 02 0721</u>	Provide and Manage Care during Pregnancy	<u>HLT MDW4 M02 1224</u>	Providing and Managing Care during Pregnancy	- Describe anatomy and physiology related with pregnancy and reproductive system - Provide general health assessment for pregnant women - Apply basic nutrition in maternal and child health - Assess and diagnose a pregnant woman - Provide health care during pregnancy	344

<u>HLT MDW4 03 0721</u>	Provide and Manage Care during Labor and Birth	<u>HLT MDW4 M03 1224</u>	Providing and Managing Care during Labor and Birth	- Describe the physiology of labor - Assess laboring mother and diagnose labor - Manage stages of labor - Manage obstetric emergencies - Organize emergency unit	490
<u>HLT MDW4 04 0721</u>	Provide and Manage Postpartum Care for Mother and Neonate	<u>HLT MDW4 M04 1224</u>	Providing and Managing Postpartum Care for Mother and Neonate	- Describe postpartum period - Perform postnatal maternal and newborn assessments and make diagnosis - Provide basic post-natal care - Manage post-natal complications - Manage patients with psychiatric disorders	210
<u>HLT MDW4 05 0721</u>	Provide and Manage Care for newborn &Children	<u>HLT MDW4 M05 1224</u>	Providing and Managing Care for newborn &Children	- Assess and classify under five children - Discuss common normal and abnormal conditions of under five children - Manage care for under five children	284

			• Promote and provide child survival, growth and development activities • Identify Nutritional problems		
<u>HLT MDW4 06 0721</u>	Provide and Manage Care for Clients with Gynecological Problems	<u>HLT MDW4 M06 1224</u>	Providing and Managing Care for Clients with Gynecological Problems	• Assess common gynecological problems • Manage common gynecological problems • Provide support for woman with common gynecological problems	232
<u>HLT MDW4 07 0721</u>	Manage Community Health Service	<u>HLT MDW4 M07 1224</u>	Managing Community Health Service	• Apply organizational guidelines, health policy and service delivery system • Manage, monitor and evaluate health system • Lead and build individual's and team's capacity	100

<u>HLT MDW4 08 0721</u>	Prevent and Eliminate MUDA using problem Solving Tools	<u>HLT MDW4 M08 1224</u>	Preventing and Eliminating MUDA using problem Solving Tools	• Prepare for work. • Identify MUDA. /Identify and select problem • Analyze causes of a problem. • Eliminate MUDA and Assess effectiveness of the solution. • Prevent occurrence of wastes/MUDA. Standardize and sustain operation.	70
--------------------------------	--	---------------------------------	---	---	----

*The time duration (Hours) indicated for the module should include all activities in and out of the TVET institution.

1.10 Institutional Assessment

Two types of evaluation will be used in determining the extent to which learning outcomes are achieved. The specific learning outcomes are stated in the modules. In assessing them, verifiable and observable indicators and standards shall be used.

The **formative assessment** is incorporated in the learning modules and form part of the learning process. Formative evaluation provides the trainee with feedback regarding success or failure in attaining learning outcomes. It identifies the specific learning errors that need to be corrected, and provides reinforcement for successful performance as well. For the teacher, formative evaluation provides information for making instruction and remedial work more effective.

Summative Evaluation the other form of evaluation is given when all the modules in the program have been accomplished. It determines the extent to which competence have been achieved. And, the result of this assessment decision shall be expressed in the term ‘competent or not yet competent’.

Techniques or tools for obtaining information about trainees’ achievement include oral or written test, demonstration and on-site observation.

1.11 TVET Teachers Profile

The teachers conducting this particular TVET Program are A Level and have satisfactory practical experiences or equivalent qualifications.

LEARNING MODULE 1	
TVET-PROGRAMME TITLE: Midwifery Level IV	
MODULE TITLE: Promoting and Providing Family Planning Service	
MODULE CODE: HLT MDW4 M01 1224	
NOMINAL DURATION: 228 Hours	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Describe the basics of family planning • Describe and provide family planning methods • Provide family planning counseling	
MODULE CONTENTS: Unit One-Basics of Family Planning 1.1 Introduction to family planning 1.2 Historical development of modern family planning 1.3 Rationale for Family Planning Services 1.4 Indicators of family planning coverage Unit Two- Family Planning Methods 2.1 Types of contraceptive methods 2.1.1. Natural family planning methods 2.1.2 Modern Family Planning Methods 2.1.3. Short acting contraceptive methods 2.1.4. Long-acting contraceptive methods 2.1.5. Permanent methods 2.2 WHO Medical eligibility criteria for family planning use 2.3. Integrating Family planning services with other RH services 2.4. Family planning needs of adolescents and youth Unit Three-Family planning counseling 3.1. Family planning Counseling based on "REDI" frame work 3.2 Providing complete information about family planning methods 3.3 Basic skills of family planning counseling	

Learning methods:

- Lecture –discussion
- Role play
- Demonstration
- Group discussion
- Exercise
- Individual assignment
- Video show

Assessment methods:

- Competence may be assessed through:
 - Interview/Written Test
 - Observation/Demonstration with Oral Questioning

ASSESSMENT CRITERIA:

Unit One-Basics of Family Planning

- Discuss history of modern family planning
- Describe the rationale for family planning services
- Interpret indicators of family planning coverage

Unit Two-Family planning methods

- Describe types of contraceptives methods
- Discuss natural family planning methods
- Describe modern Family Planning Methods
- Identify and provide short acting contraceptive methods
- Identify and provide Long-acting contraceptive methods
- Discuss Permanent family planning methods
- Describe WHO Medical eligibility criteria for contraception use
- Integrate family planning services with other RH services
- Identify family planning needs of adolescents and youth

Unit Three - Family planning counseling

- Counsel the client using "REDI" frame work based on MOH family planning guide line
- Provide complete information about each method of contraception practice for the client
- Demonstrate basic counseling skills

LEARNING MODULE 02

TVET-PROGRAMME TITLE: MIDWIFERY LEVEL IV

MODULE TITLE: Providing and Managing Care during Pregnancy

MODULE CODE: HLT MDW4 M02 1224

NOMINAL DURATION: 344 Hours

MODULE DESCRIPTION : This module covers knowledge, skill and attitude required to provide quality antenatal care and obstetric emergencies based on effective assessment and diagnosis. It also describes planning, managing and evaluating pregnancy associated conditions and provides appropriate preventive and promotive care including dietary management.

LEARNING OUTCOMES

At the end of the module the learner will be able to:

- Describe anatomy and physiology related with pregnancy and reproductive system
- Provide general health assessment
- Apply basic nutrition in maternal and child health
- Assess pregnant woman
- Provide health care during pregnancy

MODULE CONTENTS:

Unit One: Anatomy and physiology of reproductive system and pregnancy

- 1.1 Female Reproductive anatomy and physiology
- 1.2 Fetal physiology and development
- 1.3 Signs and symptoms of pregnancy
- 1.4 Physiological changes during pregnancy

Unit Two: Providing general health assessment

- 2.1. Health history
- 2.2. Components of history taking and physical examination
- 2.3. Physical examination
- 2.4. Examining different body systems (HEENT, LGS, CVS, MSS, GIS, GUS, CNS and Integumentary system)

Unit Three: Basic nutrition in maternal and child health

- 3.1 Basic nutritional elements
- 3.2 Nutritional deficiencies
- 3.3 Nutritional recommendations for pregnant woman based on FMOH nutrition guideline

Unit Four: Assessment of Pregnant Woman

- 4.1 Antenatal history
- 4.2 Antenatal physical examinations
- 4.3 Laboratory investigations for pregnant woman
- 4.4 Minor Disorders of Pregnancy
 - 4.4.1 Nausea and vomiting (Morning Sickness)
 - 4.4.2 Heart burn
 - 4.4.3 Pica
 - 4.4.4 Constipation
 - 4.4.5 Backache
 - 4.4.6 Fainting
 - 4.4.7 Varicosities
 - 4.4.8 Excessive Salivation/Pytalism

Unit Five: Providing health care during pregnancy

- 5.1. ANC Care based on "2016 WHO model of ANC care"
- 5.2. Danger Signs During pregnancy
- 5.3. PMTCT of HIV/AIDS based on national PMTCT guideline
- 5.4. Promotive and preventive care
- 5.5. High Risk Pregnancies
- 5.6. Multiple pregnancy
- 5.7. Complications of pregnancy
 - 5.7.1 Hyper-emesis Gravid rum
 - 5.7.2 Amniotic fluid disorder
 - 5.7.3 Pregnancy induced hypertension
 - 5.7.4 Ante-partum hemorrhage
 - 5.7.5 RH incompatibility
 - 5.7.6 Gestational diabetes mellitus
- 5.8 Common medical disorders of pregnancy
 - 5.8.1 Cardiac disease
 - 5.8.2 Malaria
 - 5.8.3 Anemia
 - 5.8.4 Renal disease

5.8.5 Tuberculosis

LEARNING METHODS:

Lecture-discussion

Demonstration

Group discussion

Exercise

Individual assignment

Audio/Video

ASSESSMENT METHODS:

Interview

Written test

Demonstration/Observation (clinical attachment)

ASSESSMENT CRITERIA:

Unit One: Anatomy and physiology of pregnancy and reproductive system

- Describe female reproductive anatomy and physiology
- Describe fetal physiology and development
- Identify signs and symptoms of pregnancy
- Discuss physiological changes during pregnancy

Unit Two: Providing general health assessment

- Take complete health history
- Describe components of history taking and physical examination
- Apply physical examination techniques
- Examine different body systems (HEENT, LGS, CVS, MSS, GIS, GUS, CNS and Integumentary system)

Unit Three: Basic nutrition in maternal and child health

- Describe basic nutritional elements
- Identify Nutritional deficiencies
- Apply nutritional recommendations based on FMOH nutrition guideline

Unit Four: Assessment of Pregnant Woman

- Take Antenatal history
- Perform antenatal physical examination
- Interpret relevant laboratory investigations results
- Identify and manage minor disorders of pregnancy

Unit Five: Providing health care during pregnancy

- Provide care based on "2016 WHO model of ANC"
- Identify and manage Danger Signs During pregnancy
- Provide Promotive and preventive care
- Identify high risk pregnancy
- Provide PMTCT services based on national PMTCT guideline
- Manage complications of pregnancy
- Manage common medical disorders of pregnancy

LEARNING MODULE 03	
TVET-PROGRAMME TITLE: Midwifery Level IV	
MODULE TITLE: Providing and Managing Care during Labor and Birth	
MODULE CODE: HLT MDW4 M03 1224	
NOMINAL DURATION: 490 Hours	
MODULE DESCRIPTION : This module covers the knowledge, skills and attitude required to provide quality care during labor, delivery, obstetric and neonatal emergencies	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Describe the physiology of labor • Assess laboring mother • Manage stages of labor • Manage obstetric emergencies • Organize emergency unit	
MODULE CONTENTS: Unit One: Physiology of labor 1.1. Introduction to Normal Labor 1.2. Criteria for Normal Labor 1.3. Causes of the Onset of Labor 1.4. Physiology of labor 1.5. Signs and Symptoms of Normal Labor 1.6. True and false labor Unit Two: Assessing Laboring Mother 2.1. History Taking in Labouring Mother 2.2. Physical Examination 2.3. Vaginal Examination 2.4. Laboratory investigation 2.5. Follow up Care for Laboring Mother UNIT Three: Managing Stages of Labor 3.1. Assess, diagnose and manage first stage of labor 3.1.1. Definition of first stage of labor 3.1.2. Phases of First Stage of Labor 3.1.3. Physiology of the First Stage of Labor	

- 3.1.4. Recognizing the First Stage of Labor
- 3.1.5. Quick history and physical examination of laboring mothers
- 3.1.6. Admission of laboring mothers and admission criteria
- 3.1.7. Monitor maternal, fetal and progress of labor by using partograph/LCG)
- 3.1.8. Management of Maternal Pain during Labor

3.2. Managing Second Stage of Labor

- 3.2.1. Definition of second stage of labor
- 3.2.2. Physiological Changes of Second Stage of Labor
- 3.2.3. Sign and Symptoms of Second Stage of Labor
- 3.2.4. The Mechanism of Normal Labor (Cardinal Movements)
- 3.2.5. Phases of the Second Stage of Labor
- 3.2.6. Conducting of Normal Delivery
- 3.2.7. Performing Episiotomy in Second Stage of Labor

3.3. Managing Third Stage of Labor

- 3.3.1. Definition of third stage of labor
- 3.3.2. Physiology of the Third Stage of Labor
- 3.3.3. Active Management of Third Stage of Labor (AMTSL)

3.4. Assessing and providing essential newborn care

3.5. Birth asphyxia and Neonatal Resuscitation

Unit Four: Managing Obstetric Emergencies

4.1. Dystocia of labor

- 4.1.1. Malpresentation/malposition
- 4.1.2. Feto-pelvic disproportion
- 4.1.3. Dysfunctional labor
- 4.1.4. Soft tissue obstruction
- 4.1.5. Shoulder dystocia

4.2. Trial of labor

4.3. Preterm labor

4.4. Prolonged labor

4.5. Obstructed labor

4.6. Induction of labor

4.7. Augmentation of labor

4.8. Cord presentation/prolapse

4.9. Uterine rupture

- 4.10. Third stage complications
 - 4.10.1. Postpartum hemorrhage
 - 4.10.2. Retained placenta
 - 4.10.3. Adherent placenta
 - 4.10.4. Shock
 - 4.10.5. Managing perineal tear
 - 4.10.6. Acute inversion of the uterus
- 4.11. Instrumental delivery
 - 4.11.1 Forceps Delivery
 - 4.11.2 Vacuum Extraction (Ventouse Delivery)
- 4.12. Operative and Destructive Deliveries
- 4.13. Pharmacological substances commonly used in midwifery practice

Unit Five: Organizing Emergency Unit

- 5.1 Preventing emergencies by closely monitoring of clients
- 5.2 Ensuring the clinical team roles in managing emergency
- 5.3 Ensuring readily availability of emergency drugs and supplies
- 5.4 Providing pre, intra and post-operative care
- 5.5 Managing delivery room

LEARNING METHODS:

Lecture-discussion
 Demonstration
 Group discussion
 Exercise
 Individual assignment
 Audio/Video

ASSESSMENT METHODS:

Interview
 Written test
 Demonstration/Observation
 Clinical attachment

ASSESSMENT CRITERIA:

Unit One: Physiology of Labor

- Define normal labor
- Identify criteria for normal labor
- Describe causes of the onset of labor
- Describe physiology of labor
- List signs and symptoms of normal labor
- Differentiate true and false labor

Unit Two: Assessment of Laboring Mother

- Take history of laboring mother
- Perform physical examination for laboring mother
- Perform vaginal examination
- Interpret laboratory investigations

Unit Three: Managing the Stages of Labor

- **Manage first stage of labor**
 - Define of first stage of labor
 - Identify phases of First Stage of Labor
 - Describe physiology of the First Stage of Labor
 - Recognize the First Stage of Labor
 - Monitor maternal, fetal and progress of labor (pantograph/LCG)
 - Manage Maternal Pain during Labor
- **Manage Second stage of labor**
 - Define of second stage of labor
 - Describe physiological Changes of Second Stage of Labor
 - Identify Sign and Symptoms of Second Stage of Labor
 - Discuss Mechanism of Normal Labor (Cardinal Movements)
 - Identify phases of the Second Stage of Labor
 - Conduct Normal Delivery
 - Perform Episiotomy in Second Stage of Labor
- **Manage Third stage of labor**

stage of labor

iology of the Third Stage of Labor

stage of Labor Actively (AMTSL)

- Perform essential newborns care according to the national guideline
- Manage birth asphyxia
- Perform neonatal resuscitation

Unit Four: Managing Obstetric Emergencies

- Describe Dystocia of labor
 - Manage Malpresentation/malposition
 - Manage Feto-pelvic disproportion
 - Manage Dysfunctional labor
 - Manage Soft tissue obstruction
 - Shoulder dystocia
- Manage Preterm labor
- Describe Trial of labor
- Manage Prolonged labor
- Identify Obstructed labor
- Perform Induction of labor
- Perform Augmentation of labor
- Identify Cord presentation/prolapse
- Uterine rupture
- Manage third stage complications
 - Manage postpartum hemorrhage
 - Manage retained placenta
 - Identify Adherent placenta
 - Manage shock
 - Manage Perineal Tears (lacerations)
 - Manage Inversion of the uterus
- Assist Instrumental delivery
 - Assist Forceps Delivery
 - Assist Vacuum Extraction (Ventouse Delivery)
 - Assist Operative and Destructive Deliveries
 - Refer Emergency situations timely
 - Identify Pharmacological substances commonly used in midwifery practice

Unit Five: Organizing Emergency Unit

- Prevent occurrence of emergency with close monitoring
- Ensure the clinical team roles in managing emergency.
- Ensure the availability of emergency drugs and supplies
- Provide pre, intra and post-operative care
- Manage delivery room

LEARNING MODULE 04	
TVET-PROGRAMME TITLE: Midwifery Level IV	
MODULE TITLE : Providing and Managing Postpartum Care for Mother and Neonate	
MODULE CODE : HLT MDW4 M04 1224	
NOMINAL DURATION : 210 Hours	
MODULE DESCRIPTION : This module covers the knowledge, skills and attitude required to provide comprehensive, quality and culturally sensitive postnatal care including post-partum assessment, diagnosis, and management for women and the new-born. This module also describes the knowledge, skills and attitude required to provide care for patients with psychiatric problems.	
LEARNING OUTCOMES At the end of the module the learner will be able to: At the end of the module the learner will be able to: • Describe Postpartum Period • Perform Postnatal Maternal and Newborn Assessment • Provide routine post-natal care • Manage post-natal complications • Manage patients with psychiatric disorders	
MODULE CONTENTS: Unit One: Postpartum Period 1.1 Physiologic changes during postnatal 1.2. Physiological adaptation of the newborn 1.3. Breast Feeding and Initiation of Lactation Unit Two. Assessment of Post-natal Mother and Newborn 2.1. History taking 2.2. Physical examination of the mother 2.3. Physical examination of the newborn 2.4. Laboratory investigations Unit Three: Routine Post-Natal Care 3.1. Post natal care for the mother 3.2. Routine neonatal care Unit Four: Post Natal Complications 4.1. Minor complications of postnatal mother 4.2. Major complications of the post-natal mother	

4.3. Special care for preterm and low birth weight babies

Unit Five: Psychiatric Disorders During Post-natal Period

5.1 Psychiatric disorders

- 5.1.1. Postpartum blue
- 5.1.2. Postpartum depression
- 5.1.3. Post partum psychosis

LEARNING METHODS:

Lecture-discussion
 Demonstration
 Group discussion
 Exercise
 Individual assignment
 Audio/Video

ASSESSMENT METHODS:

Interview
 Written test
 Demonstration/Observation
 Clinical attachment

Assessment Criteria

Unit One: Postpartum Period

- Describe physiologic changes during postnatal
- Discuss physiological adaptation of the newborn
- Describe breast Feeding and Initiation of Lactation

Unit Two: Assessment of Post-natal Mother and Newborn

- Take postnatal history
- Perform physical examination to mother
- Perform physical examination to newborn baby
- Interpret laboratory investigations

Unit Three: Routine Post-Natal Care

- Provide post-natal care for the mother
- Provide basic neonatal care

Unit Four: Post-Partum Complications

- Manage minor complications of postnatal mother

- Manage major complications of postnatal mother
- Provide special care for preterm and low birth weight babies

Unit Five: Psychiatric Disorders During Postpartum

- Identify psychiatric disorders
 - ✓ Manage Postpartum blue
 - ✓ Manage postpartum depression
 - ✓ Manage Post partum psychosis

LEARNING MODULE 05	
TVET-PROGRAMME TITLE: Midwifery level-IV	
MODULE TITLE : Providing and Managing Care for Newborn &Children	
MODULE CODE : HLT MDW4 M05 1224	
NOMINAL DURATION : 284 hours	
MODULE DESCRIPTION : This module covers knowledge, skills and attitude related to the new-borns and Under five children care, that enable midwives to provide basic emergency and preventive care for the clients/patients	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Assess under five children • Discuss common normal conditions of under five children • Provide care for under five children • Promote and provide child survival, growth and development activities • Identify Nutritional problems	
MODULE CONTENTS: Unit One: Assessment of Under Five Children 1.1 Assessment of under five children based on IMNCI approach 1.1.1 History Taking 1.1.2 Physical examination Unit Two: Common Normal Conditions of Under Five Children 2.3 Child development 2.4 Childhood Immunization Unit Three: Providing Care for Under Five Children 3.1 Infants with special problems 3.1.1. Post term infant 3.1.2. SGA, LGA 3.1.3. Pathologic and physiologic jaundice 3.1.4. Epispadias and Hypospadias 3.1.5. Imperforate anus	

3.1.6. Undescended testicle

3.1.7. Spinal bifida

3.1.8. Hydrocephalus

3.1.9. Anencephaly

3.1.10. Microcephaly

3.1.11. Club foot

3.1.12. Cleft palate and Cleft lip

3.1.13. Esophageal atresia

3.1.14. Diaphragmatic Hernia

3.1.15. Omphalocele

3.3. Managing common child hood problems

3.1.1 Meningitis

3.1.2 Respiratory distress syndrome

3.1.3 Conjunctivitis

3.1.4 ARI

3.1.5 Diarrhea

3.1.6 Measles

3.1.7 Malaria

3.1.8 Otitis media

Unit Four: Child survival, growth and development activities

4.1. Child feeding practices

4.2. Key messages to prevent illnesses and health seeking behaviors.

4.3. Child abuse

Unit Five: Nutritional problems

5.1 Protein energy malnutrition

5.2 Vitamin A deficiency

5.3 Vitamin D deficiency

Unit Six: Child requiring further care

6.1. Document relevant child's information in detail

6.2. Maintain client confidentiality

6.3 Maintain child's care throughout referral process till responsibility is taken over by receiving institutions

LEARNING METHODS:

6 Lecture-discussion

7 Demonstration

8 Group discussion

9 Exercise

10 Individual assignment

11 Role play

12 Video show

ASSESSMENT METHODS:

12.1 Interview

12.2 Written test

12.3 Demonstration

12.4 Clinical attachment

ASSESSMENT CRITERIA:

Unit One: Assessment of under five children

- Assess under five children based on IMNCI approach
- Take history
- Perform Physical examination.

Unit Two: Common normal conditions of under five children

- Describe childhood development
- Discuss and provide childhood Immunization

Unit Three: Providing care for under five children

- Manage infants with special problems
- Manage common child hood problems

Unit Four: Child survival, growth and development activities

- Demonstrate appropriate child feeding practices to the care giver
- Provide appropriate messages to prevent illnesses to the care givers
- Explain health seeking behaviors
- Describe child abuse

Unit Five - Nutritional problems (nutritional deficiency disease)

- Describe Protein energy malnutrition
- Explain Vitamin A deficiency
- Discuss Vitamin D deficiency

Unit Six: Child Requiring Further Care

- Record relevant child's details according to standard guidelines.
- Explain and maintain client confidentiality
- Provide care to the child throughout the referral process.

LEARNING MODULE 06	
TVET-PROGRAMME TITLE: Midwifery Level IV	
MODULE TITLE : Providing and Managing Care for Clients with Gynecological Problems	
MODULE CODE : HLT MDW4 M06 1224	
NOMINAL DURATION : 232 Hours	
MODULE DESCRIPTION : This unit describes the knowledge, skill and attitude required to give care for clients with gynecological disorders. Besides, it assists the students to develop basic understanding in this field and function not only as midwifery practitioner but also as educator and manager after graduation.	
LEARNING OUTCOMES At the end of the module the learner will be able to: • Describe common gynecological problems • Manage common gynecological problems • Provide support for woman with common gynecological problems	
MODULE CONTENTS: Unit One - Common gynecological problems 1.1 Basics of gynecology 1.2 Gynecologic history 1.3 Performing Physical examination 1.4 Performing Common gynecologic diagnostic procedures 1.4.1 Acetic acid (cervical cancer screening), pap smear Unit Two: Managing Common Gynecological Problems 2.1.Minor gynecological problems 2.1.1 1st trimester abortions 2.1.2 Lower genital tract infections and sexually transmitted infections 2.1.3 Pelvic inflammatory diseases 2.1.4 Dysmenorrhea 2.5 Advanced care of gynecological problems 2.2.1 2nd trimester abortion & complicated cases 2.2.2 Gestational trophoblastic diseases	

- 2.2.3 Ectopic pregnancy
- 2.2.4 Infertility
- 2.2.5 Genital organ prolapse (utero vaginal prolapse)
- 2.2.6 Genital injuries
- 2.2.7 Reproductive tract malformation
- 2.2.8 Premenopausal syndromes
- 2.2.9 Abnormal uterine bleeding
- 2.2.10 Dysfunctional uterine bleeding,

2.3. Reproductive tract malignancies and tumors

- 2.3.1 Cervical cancer and tumors
- 2.3.2 Ovarian cancer and tumors
- 2.3.3 Endometrial cancer and tumors
- 2.3.4 Breast cancer and tumors

Unit Three: Support for Woman with Common Gynecological Problems

- 3.1 . Counseling and/or referring woman with common gynecological problems
- 3.2 . Psychosocial support for woman with common gynecological problems
- 3.3 . Women Friendly care

LEARNING METHODS:

- Lecture-discussion
- Demonstration
- Group discussion
- Exercise
- Individual assignment

ASSESSMENT METHODS:

- Interview
- Written test
- Demonstration/Observation
- Clinical attachment

ASSESSMENT CRITERIA:

Unit One: Common Gynecological Problems

- Describe basics of gynecology
- Take Gynecologic history
- Perform physical examination
- Perform common gynecologic diagnostic procedures
- Assist Acetic acid (cervical cancer screening) and pap smear

Unit Two: Managing Common Gynecological Problems

- Identify and manage minor gynecological problems
- Explain gynecological problems need advanced managements.
- Describe reproductive tract tumors and malignancies.

Unit Three: Support for Woman with Common Gynecological Problems

- Provide counseling and refer woman with common gynecological problems
- Provide psychosocial support for woman with common gynecological problems
- Provide women friendly care.

LEARNING MODULE 07

TVET-PROGRAMME TITLE: Midwifery level-IV
MODULE TITLE : Managing Community Health Service
MODULE CODE : <u>HLT MDW4 M07 1224</u>
NOMINAL DURATION : 100 hours
MODULE DESCRIPTION : This unit covers the knowledge, skills and attitude required to manage health service of the area to improve quality of service.
LEARNING OUTCOMES At the end of the module the learner will be able to: • Apply organizational guidelines, health policy and service delivery system • Manage, monitor and evaluate health system • Lead and build individual's and team's capacity
Modules Contents : Unit One -Organizational guidelines, health policy and service delivery system 1.1 Policy and organization of the health care system of Ethiopia 1.2 Primary healthcare in Ethiopia 1.3 Elements of primary health care 1.4 Health service extension program 1.5 Workplace instructions and policies 1.6. Organizational programs and procedures 1.7. Organizational resources for the purpose intended Unit Two: Managing, monitoring and evaluating health system 2.1 Management skills 2.2. Plan health programs 2.3. Manage healthcare resources 2.4. Principles of health care ethics 2.5. Individual and team capacity 2.6. Management conflict 2.7. Health service monitoring and evaluation mechanism Unit Three: Leading and building individual's and team's capacity

- 3.1. Self- improvement areas based on individual's self- performance evaluation
- 3.2. Goals and objectives of learning and development programs
- 3.3. Learning and development needs in line with organizational requirements
- 3.4. Workplace learning opportunities and coaching/ mentoring
- 3.5. Joint action plans by team and individuals.
- 3.6. Duties and responsibilities based on competencies
- 3.7. Collaborative efforts to attain organizational goals
- 3.8. Feedback mechanism

LEARNING METHODS:

- Lecture-discussion
- Demonstration
- Group discussion
- Exercise
- Individual assignment

ASSESSMENT METHODS:

- Interview
- Written test
- Demonstration/Observation

ASSESSMENT CRITERIA:

Unit One: Organizational Guidelines, Health Policy and Service Delivery System

- Explain the policy and organization of the health care system of Ethiopia
- Explain primary healthcare in Ethiopia
- Identify elements of primary health care are
- Discuss health service extension program
- Apply workplace instructions and policies.
- Explain organizational programs and procedures
- Describe organizational resources
- Identify equity issues in population health
- Describe basic principles of leadership

Unit Two: Managing, Monitoring and Evaluating Health System

- Describe Management skills
- Plan health programs
- Managing health care resource
- Identifying principles of health care ethics
- Develop Individual and team capacity
- Resolving Management conflict
- Describe health service monitoring and evaluation mechanisms.

Unit Three: Leading And Building Individual's and Team's Capacity

- Identify self- improvement areas based on individual's self- performance evaluation.
- Describe goals and objectives of learning and development programs
- Identify learning and development needs in line with organizational requirements
- Provide workplace learning opportunities and coaching/ mentoring
- Develop joint action plans by team and individuals.
- Allocate duties and responsibilities based on competencies.
- Make collaborative efforts to attain organizational goals
- Identify feedback mechanism to bring about improvement
