Preface

The reformed TVT-System is an outcome-based system. It utilizes the needs of the labor market and occupational requirements from the world of work as the benchmark and standard for TVT delivery. The requirements from the world of work are analyzed and documented – taking into account international benchmarking – as occupational standards (OS).

In the reformed TVT-System, curricula and curriculum development play an important role with regard to quality driven comparable TVT-Delivery. The Curricula help to facilitate the training process in a way, that trainees acquire the set of occupational competences (skills, knowledge and attitude) required at the working place and defined in the occupational standards (OS).

This curriculum has been developed by a group of professional experts from different Regional TVT Bureaus, colleges, Industries, Institutes and universities based on the occupational standard for Nursing Level IV.

The curriculum development process has been actively supported and facilitated by Ministry of Labor and Skills.

1. TVT-Program Design

1.1.TVT-Program Title: Nursing level-IV

1.2.TVT-Program Description

The Program is designed to develop the necessary knowledge, skills and attitude of the trainees to the standard required by the occupation. The contents of this program are in line with the occupational standard. The Trainees who successfully completed the Program will be qualified to work as a **Nurse** with competencies elaborated in the respective OS. Graduates of the program will have the required qualification to work in the **Health** sector in the field of **Nursing**.

The prime objective of this training program is to equip the Trainees with the identified competences specified in the OS. Graduates are therefore expected to Provide advanced nursing care, Perform Nursing Assessment, Prevent and Manage Common Communicable and Neglected Tropical Diseases, Prevent and Manage Common Non-communicable diseases, Provide Care in the Pre/Post and Intra Operative Nursing, Provide Maternal Health Care, Provide Child Health Care, Manage Nutritional Problems and Provide Dietary Service, Provide mental health care, Provide community health nursing , Manage Community Health Service, Prevent and Eliminate MUDA in accordance with the performance criteria and evidence guide described in the OS.

1.4. Duration of the TVT-Program

The Program will have duration of **2029** hours including the on school/ Institution training and on-the-job practice or cooperative training time. Such cooperative training based on realities of the industry, nature of the occupation, location of the TVT institution, and other factors will be considered in the training delivery to ensure that trainees acquire practical and workplace experience.

S.No	Module	In school training		Cooperative training	Team Training	Total hours	Remarks
		Theory	Practical				
1.	Advanced Nursing Care	84	112	59	25	280	
2.	Nursing Assessment	53	70	37	16	176	
3.	Communicable and Neglected Tropical Diseases	72	0	22	9	112	
4.	Medical - Surgical nursing	184	32	140	32	356	
5.	Non-communicable diseases	48	0	55	23	126	
6.	Pre, intra and Post ,Operative Nursing	32	43	22	10	107

1.5. Qualification Level and Certification

Based on the descriptors elaborated on the Ethiopian National TVET Qualification Framework (NTQF) the qualification of this specific TVET Program is “Level IV”.

The learner will not awarded any certificate before completion of all the modules that are designed for the exist in level IV

1.6.Target Groups

Any citizen who meets the entry requirements under items 1.7 and capable of participating in the training activities is entitled to take part in the Program.

1.7.Entry Requirements

In principle everyone should be able to access training based on the labor market. Hence the prospective participants of this program are any citizen who possesses the entry requirement directive of the Ministry of Labor and Skills.

1.8.Mode of Delivery

This TVT-Program is characterized as a formal Program on middle level technical skills. The mode of training delivery is in the institution and co-operative training. Cooperative training is a model of training by the cooperation of enterprises/industries and TVT institutions whereby trainees spend much of their time in the enterprises/industries to acquire industrial knowledge, skills, experiences, and attitudes of the industrial environment and the remaining time in TVT institutions to acquire basic skills and theoretical concepts. Therefore, it is necessary to make the TVT sector more effective by strengthening a system of cooperative training accepted by the industry.

Logo 	Company Name: የሥራና ክህሎት ሚኒስቴር MINISTRY OF LABOR AND SKILLS	Form No.: OF/MoLS/TVT/029	
Form Title: Nursing lever IV curriculum version II		Issue No: 1	Page No: Page 12 of 90

The program will employ different alternatives of cooperative training such as apprenticeships, internship and traineeship based on the nature of the occupation, location of the TVT institutions, and interest of the industry. In addition, in the areas where industry is not sufficiently available the established production and service centers/learning factories in TVT institutions will be used as cooperative training places. The Training-Institution and identified companies should have to take an agreement to co-operate with regard to the implementation of this program.

1.9. Institutional Assessment

Two types of evaluation will be used in determining the extent to which training outcomes are achieved. The specific training outcomes are stated in the modules. In assessing them, verifiable and observable indicators and standards shall be used.

The **formative assessment** is incorporated in the training modules and form part of the training process. Formative evaluation provides the trainee with feedback regarding success or failure in attaining training outcomes. It identifies the specific training errors that need to be corrected, and provides reinforcement for successful performance as well. For the teacher, formative evaluation provides information for making instruction and remedial work more effective.

Summative Evaluation the other form of evaluation is given when all the modules in the program have been accomplished. It determines the extent to which competence have been achieved. And, the result of this assessment decision shall be expressed in the term of institutional Assessment implementation guidelines..

Techniques or tools for obtaining information about trainees' achievement include oral or written test, demonstration and on-site observation.

1.10. TVT Teachers Profile

The teachers conducting this particular TVT Program are B Level and above who have satisfactory practical experiences or equivalent qualifications.

1.11. Training and Assessment methodology

The program is delivered using a variety of training methods. The table below shows training and assessment methodology for non-impaired trainees and with reasonable adjustment for impaired trainees. In addition, as per the nature of the module title the trainer can use recommended and possible training and assessment methodology.

Learning Methods:				
For none impaired trainees	Reasonable Adjustment for Trainees with Disability (TWD)			
	Low Vision	Deaf	Hard of hearing	Physical impairment
Lecture-discussion	❖ Provide large print text ❖ Prepare the lecture in Audio/video ❖ Organize the class room seating arrangement to be accessible to trainees ❖ Write short notes on the black/white board using large text ❖ Make sure the luminosity of the light of class room is kept ❖ Use normal tone of voice ❖ Encourage trainees to record the lecture in audio format ❖ Provide Orientation on the physical feature of the work shop ❖ Summarize main points	❖ Assign sign language interpreter ❖ Arrange the class room seating to be conducive for eye to eye contact ❖ Make sure the luminosity of the light of class room is kept ❖ Introduce new and relevant vocabularies ❖ Use short and clear sentences ❖ Give emphasis on visual lecture and ensure the attention of the trainees ❖ Avoid movement during lecture time ❖ Present the lecture in video format ❖ Summarize main points	❖ Organize the class room seating arrangement to be accessible to trainees ❖ Speak loudly ❖ Ensure the attention of the trainees ❖ Present the lecture in video format ❖ Ensure the attention of the trainees	❖ Organize the class room seating arrangement to be accessible for wheelchairs users. ❖ Facilitate and support the trainees who have severe impairments on their upper limbs to take note ❖ Provide Orientation on the physical feature of the work shop

Demonstration	❖ Conduct close follow up ❖ Use verbal description ❖ Provide special attention in the process of guidance ❖ facilitate the support of peer trainees ❖ Prepare & use simulation	❖ use Sign language interpreter ❖ Use video recorded material ❖ Ensure attention of the trainees ❖ Provide structured training ❖ Show clear and short method ❖ Use gesture ❖ provide tutorial support (if necessary)	❖ Illustrate in clear & short method ❖ Use Video recorded material ❖ Ensure the attention of the trainees ❖ provide tutorial support (if necessary)	❖ Facilitate and support the trainees having severe upper limbs impairment to operate equipments/ machines ❖ Assign peer trainees to assist ❖ Conduct close follow up ❖ provide tutorial support (if necessary)
Group discussion	❖ Facilitate the integration of trainees with group members ❖ Conduct close follow up ❖ Introduce the trainees with other group member ❖ Brief the thematic issues of the work	❖ Use sign language interpreters ❖ Facilitate the integration of trainees with group members ❖ Conduct close follow up ❖ Introduce the trainees with other group member	❖ Facilitate the integration of trainees with group members ❖ Conduct close follow up ❖ Introduce the trainees with other group member ❖ Inform the group members to speak loudly	❖ Introduce the trainees with their peers
Exercise	❖ Conduct close follow up and guidance ❖ Provide tutorial support if necessary ❖ provide special attention in the process	❖ Conduct close follow up and guidance ❖ Provide tutorial support if necessary ❖ provide special attention in the process/practical training ❖ Introduce new and relevant vocabularies	❖ Conduct close follow up and guidance ❖ Provide tutorial support if necessary ❖ provide special attention in the process/ practical training	❖ Assign peer trainees ❖ Use additional nominal hours if necessary

Individual assignment	❖ prepare the assignment questions in large text ❖ Encourage the trainees to prepare and submit the assignment in large texts ❖ Make available recorded assignment questions ❖ Facilitate the trainees to prepare and submit the assignment in soft or hard copy	❖ Use sign language interpreter ❖ Provide briefing /orientation on the assignment ❖ Provide visual recorded material	❖ Provide briefing /orientation on the assignment ❖ Provide visual recorded material	
------------------------------	---	--	---	--

Assessment Methods:

Interview		❖ Use sign language interpreter ❖ Ensure or confirm whether the proper communication was conducted with the trainee through the service of the sign language interpreter ❖ Use short and clear questioning ❖ Time extension	❖ Speak loudly ❖ Using sign language interpreter if necessary	❖ Use written response as an option for the trainees having speech challenges
Written test	❖ Prepare the exam in large texts ❖ Use interview as an option if necessary ❖ Prepare the exam in audio format ❖ Assign human reader (if necessary) ❖ Time extension	❖ Prepare the exam using short sentences, multiple choices, True or False, matching and short answers ❖ Avoid essay writing ❖ Time extension	❖ Prepare the exam using short sentences, multiple choices, true or false, matching and short answers if necessary.	❖ Use oral response as an option to give answer for trainees having severe upper limb impairment ❖ Time extension for trainees having severe upper limb impairment

Demonstration /Observation	❖ Brief the instruction or provide them in large text ❖ Time extension	❖ Use sign language interpreter ❖ Brief on the instruction of the exam ❖ Provide activity-based/ practical assessment method ❖ Time extension	❖ Provide activity based assessment ❖ Brief on the instruction of the exam ❖ Use loud voice ❖ Time extension	❖ Provide activity based assessment ❖ Conduct close follow up ❖ Time extension
-----------------------------------	---	--	---	--

1. Learning module design

Module Code and Title	HLT NUR4 M01 12 24 :Advanced Nursing Care
Nominal Duration:	280 Hours
Module Description: This module aims to describe knowledge, skills and attitude required to perform and assist advanced nursing care in health facilities and community service	
Training Outcomes At the end of the module the trainee will be able to: ○ Work in the context of professional practice • Assist therapeutic and diagnostic procedures • Perform and assist advanced nursing procedures	
Module Contents: Unit One: Professional practice 1.1 Wellness model of care 1.2 Nursing profession and education 1.3 Scope and role of nursing practice 1.4 Parameters of nursing practice 1.5 Multidisciplinary team Unit Two: Therapeutic and diagnostic procedures 2.1 Therapeutic instruments and procedures	

2.2 Diagnostic instruments and procedures

Unit Three: Advanced nursing procedures

- 3.1 vein cut down
- 3.2 Thoracentesis procedure
- 3.3 Postural drainage
- 3.4 Chest water seal drainage system
- 3.5 Airway Suction
- 3.6 Coughing and deep-breathing exercise
- 3.7 Steam inhalation
- 3.8 Oxygen therapy
- 3.9 Tracheostomy care
- 3.10 Bronchoscopy
- 3.11 Gastric analysis
- 3.12 Endoscope examination
- 3.13 Gastric aspiration
- 3.14 Gastrostomy feeding
- 3.15 Gastric lavage
- 3.16 Gastric gavage
- 3.17 Colostomy care
- 3.18 Enemas
- 3.19 Rectal wash out
- 3.20 Flatus tube

- 3.21 Urinary catheterization
- 3.22 Bladder irrigation
- 3.23 Dialysis procedures
- 3.24 Visual acuity measurement
- 3.25 Ophthalmoscopic examination
- 3.26 Ear irrigation
- 3.27 Ear instillation
- 3.28 Installation of nasal drop
- 3.29 Throat gurgle
- 3.30 Othoscopic examination
- 3.31 Lumber puncture
- 3.32 Neuro-radio-graphic examination
- 3.33 Application of cast
- 3.34 Crutch walking
- 3.35 Traction application
- 3.36 Bone marrow aspiration

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: Professional practice

- Describe wellness and illness
- Wellness model of care
- Nursing profession and education
- Scope and role of nursing practice
- Parameters of nursing practice

Unit Two: Therapeutic and diagnostic procedures

- Describe therapeutic procedures
- Describe diagnostic procedures
- Identify therapeutic procedure instruments
- Identify diagnostic procedures instruments

Unit Three: Advanced nursing procedures

- Assist in vein cut down
- Assist in thoracentesis procedure
- Perform postural drainage
- Chest water seal drainage system
- Suction the airway
- Cough and deep-breath exercise
- Administer steam inhalation
- Administer oxygen therapy
- Perform Tracheostomy care
- Assist bronchoscopy

- Assist the patient in gastric analysis
- Assist the patient in Endoscope examination
- Perform gastric aspiration
- Perform gastrostomy feeding
- Perform gastric lavage
- Perform gastric gavage
- Give Colostomy care
- Give enemas
- Offer rectal wash out
- Insert flatus tube
- Perform urinary catheterization
- Perform bladder irrigation
- Assist in dialysis procedures
- Assist visual acuity measurement
- Assist on ophthalmoscopic examination
- Perform Ear irrigation
- Perform ear instillation
- Perform installation of nasal drop
- Perform throat gurgle
- Assist on Othoscopic examination
- Assist in lumber puncture

- Assist in neuro-radio-graphic examination
- Assist application of cast
- Crutch walking
- Traction application
- Assist bone marrow aspiration

Module Code and Title	HLT NUR4 M02 12 24 : NURSING ASSESSMENT
Nominal Duration:	176 Hours
Module Description: This module aims to provide the trainees with the knowledge, skills and attitude required to undertake nursing assessment, nursing diagnosis, nursing planning, nursing implementation and nursing evaluation of patient care	
Training Outcomes At the end of the module the trainee will be able to: • Perform nursing assessment • Develop nursing diagnosis • Develop nursing plan • Implement nursing plan • Perform nursing evaluation	
Module Contents: Unit One: Nursing assessment 1.1. Concepts and types of assessment 1.2. History taking and physical examination/Medical approach/ 1.3. Gordon's /functional pattern assessment/ 1.4. Actual and potential patient problems 1.5. Holistic assessment approaches 1.6. Inpatient records Unit Two: Nursing diagnosis 2.1. Types of nursing diagnosis 2.2. Problem prioritize 2.3. Develop Nursing diagnosis Based on NANDA Unit Three: Nursing plan 3.1. Prioritize Problem 3.2. Set Goals/expected outcomes 3.3. Nursing interventions	

3.4.Implement the plan

3.5.Nursing care plan record

Unit Four: Nursing plan Implement

4.1.Plan implementation/interventions

4.1 Maintain standard and guideline during implementation

Unit Five: Nursing evaluation

5.1 Type of Evaluation

5.2 Evaluate nursing process

5.3 Apply re-assessment

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: Nursing assessment

- Describe concepts and types of assessment.
- Identify actual and potential patient problems.
- Use holistic approaches are used during assessment.
- Record inpatient chart.

Unit Two. Nursing diagnosis

- Identify types of nursing diagnosis.
- Prioritize problems for the process based on the assessment
- Develop nursing diagnosis using NANDA
- Keep records in patient chart

Unit Three. Nursing plan

- Prioritize problems based on basic life need.
- Identify Goals/expected outcomes.
- Select appropriate interventions for the problems.
- Identify resource implications to implement the plan
- Keep records in nursing care plan format

Unit Four. Nursing plan implement

- Implementation of plan
- Identify Standard and guideline

Unit Five. Nursing evaluation

- Identify types of evaluations
- Evaluate nursing process according to outcome criteria
- Re-assessment are applied whether the expected outcomes are achieved or not
- Keep records in nursing care plan format

Module Code and title	Code: HLT NUR M12 1224 : Communicable and Neglected Tropical Diseases
Nominal Duration:	112 Hours
Module Description: The aim of this module to provide the trainees with the knowledge, skills and attitude required to identify common communicable and neglected tropical diseases, provide basic preventive, curative and referral services, undertake integrated diseases surveillance.	
Training Outcomes At the end of the module the trainee will be able to: • Apply general principles of diseases prevention and control • Assess, screen and manage common communicable diseases • Assess, screen, promote and manage common Neglected Tropical diseases • Perform disease Surveillance • Follow up of Cases	
Module Contents: Unit One: General principles of diseases prevention and control. 1.1.Common communicable diseases and Neglected tropical diseases 1.2.Community health problems 1.3.Strategies to resolve community health problems	

1.4. Most At Risk Populations (MARPs)

1.5. Prevention and control measures

1.6. Community health activity report

Unit Two: Assess, screen and manage common communicable diseases

2.1. Feco-orally transmitted Diseases

2.2. Food borne diseases

2.3. Zoonotic Diseases

2.4. Sexually transmitted disease

2.5. Arthropod borne (intermediate host borne) communicable disease

2.6. Air borne or direct contact communicable diseases

Unit Three: Assess, screen, promote and manage common Neglected Tropical diseases

3.1. Schistosomiasis

3.2. Leishmaniasis

3.3. Lymphatic Filariasis

3.4. Podoconiosis

3.5. Trachoma

3.6. Onchocerciasis

3.7. Scabies

3.8. Leprosy

3.9. Dracunculiasis/Guinea worm disease

3.10. Referring Special cases for further investigation

Unit four: Disease Surveillance

- 4.1.Disease Surveillance
- 4.2.Active and passive surveillance
- 4.3.Organizing, analyzing and interpreting of surveillance Data
- 4.4.Determination of Possible and probable cases based on the standard case definition
- 4.5.Epidemic investigations and management
- 4.6.Submitting timely and complete reports
- 4.7.Collecting and disseminating feedback

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: General principles of diseases prevention and control.

- Describe principles of diseases prevention and control methods
- Identify and classify Common communicable and neglected tropical diseases
- Explore Community health problems
- design Strategies to resolve the health problems
- Identify Most At Risk Populations (MARPs)
- Apply Disease specific prevention and control measures
- perform Compilation, reporting and documentation

Unit two: Assess, screen and manage common communicable diseases

- Assess Common communicable diseases
- Screen Common communicable diseases
- Manage Common communicable diseases
- Manage Special groups and cases

Unit Three: Assess, screen, promote and manage of common Neglected Tropical diseases

- Assesse Common neglected tropical disease
- Screen Common neglected tropical disease
- Apply Prevention and control of Common neglected tropical disease
- Manage Common neglected tropical disease
- Arrange Referral of Special cases

Unit four: Disease Surveillance

- Get prepared integrated disease Surveillance
- Collect data through active and passive surveillance
- Manage surveillance data
- Determine possible and probable cases based on the standard case definition
- Perform Epidemic investigations and management
- Make timely and complete reporting
- Collect and disseminate feedback

Module Code and Title	HLT NUR4 M04 1224 : Medical Surgical Nursing
Nominal Duration:	356 Hours
Module Description: This module aims to describe knowledge, skills and attitude required to to t care of the person with medical and surgical health problems by performing nursing interventions that support their health care needs and assist them to regain optimal function and life style.	
Training Outcomes At the end of the module the trainee will be able to: • Identify the impact of Medical -Surgical health problems • Contribute to multidisciplinary health care team • Perform nursing interventions for medical and surgical health problems	
Module Contents: Unit One: Medical-Surgical health problems impact. 1.1 Basic concept of Medical -Surgical nursing 1.2. Acute and chronic health care 1.3. Physical, psychological, social and economic impacts of illness 1.4. History taking and physical examination including NANDA Unit Two: Multi-disciplinary health care team. 2.1. Basic concept of multi-disciplinary team 2.2. Role of specialist nursing 2.3. Critical situation and Critical thinking 2.4. Geriatrics care. 2.5. Admission and discharge Unit Three: Medical - Surgical related disorders	

3.1 . Integumentary system disorders

- 3.1.1 Overview of anatomy and physiology
- 3.1.2 Integumentary system function assessment
- 3.1.3 Inflammatory and allergic conditions of the skin
- 3.1.4 Bacterial skin infections
- 3.1.5 Fungal skin infections
- 3.1.6 Viral skin disease
- 3.1.7 Skin cancer
- 3.1.8 Skin graft
- 3.1.9 Burn injury

3.2 Musculoskeletal system disorders

- 3.2.1 Overview of anatomy and physiology
- 3.2.2 Musculoskeletal system assessment
- 3.2.3 Soft tissue injuries
- 3.2.4 Fracture
- 3.2.5 Joints and connective tissue disorders

3.3 Respiratory system disorders

- 3.3.1 Overview of anatomy and physiology
- 3.3.2 Respiratory system functions assessment
- 3.3.3 Upper respiratory disorders
- 3.3.4 Lower respiratory disorders

3.4. Cardio vascular system disorders

- 3.4.1. Overview of anatomy and physiology
- 3.4.2. Cardiovascular system functions assessment
- 3.4.3. Arrhythmia
- 3.4.4. Congestive heart failure
- 3.4.5. Rheumatic fever and rheumatic heart disease
- 3.4.6. Infective endocarditis
- 3.4.7. Pericarditis

- 3.4.8. Myocardial infarction
- 3.4.9. Angina pectoris
- 3.4.10. Vascular disorders
- 3.4.11. Shock
- 3.4.12. Arteriosclerosis and atherosclerosis
- 3.4.13. Aneurysm
- 3.4.14. Varicose veins
- 3.4.15. Thrombophlebitis and phlebothrombosis
- 3.4.16. Blood disorders
- 3.5. Gastrointestinal system disorders
 - 3.5.1. Overview of anatomy and physiology
 - 3.5.2. Gastro intestinal system functions assessment
 - 3.5.3. Mouth and related structures problems
 - 3.5.4. Oesophageal disorders
 - 3.5.5. Gastric and duodenal disorders
 - 3.5.6. Blunt abdominal injuries
 - 3.5.7. Intestinal disorders
 - 3.5.8. Ano-rectal disorders
- 3.6. Pancreatic, Hepatic and Biliary disorders
- 3.7. Endocrine system disorders
 - 3.7.1. Overview of anatomy and physiology
 - 3.7.2. Endocrine system functions assessment
 - 3.7.3. Diabetes mellitus
 - 3.7.4. Thyroid gland disorders
 - 3.7.5. Parathyroid gland disorders
 - 3.7.6. Adrenal gland disorders
 - 3.7.7. Pituitary gland disorders
- 3.8. Genito-Urinary system disorders
 - 3.8.1 Overview of anatomy and physiology
 - 3.8.2 Genito-urinary system functions assessment
 - 3.8.3 Renal and urinary system disorders

- 3.9. Ear, Eye, Nose, and Throat disorders
 - 3.9.1 Overview of anatomy and physiology
 - 3.9.2 Ear, Eye, Nose, and Throat functions assessment
 - 3.9.3 Ear problems
 - 3.9.4 Nose and Throat disorders
 - 3.9.5 Eye problems
- 3.10. Nervous system disorders
 - 3.10.1 Nervous system functions assessment
 - 3.10.2 Neurological disorders

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: Medical-Surgical health problems impact.

- Describe basic concept of medical –surgical nursing
- Identify acute and chronic health problems impact
- Perform history taking and physical examination
- Identify hierarchy of human needs

Unit Two: Multi-disciplinary health care team.

- Describe multi-disciplinary health care team
- Apply critical thinking and problem solving approaches
- Identify geriatrics care
- Perform admission and discharge

Unit Three: Medical - Surgical related disorders

- Provide care for integumentary system disorders
- Give care for musculoskeletal system disorders

- Provide care for respiratory system disorders
- Provide care for cardio vascular system disorders
- Give care for gastrointestinal system disorders
- Provide care for pancreatic, hepatic and biliary disorders
- Provide care for endocrine system disorders
- Provide care for genito-urinary system disorders
- Provide care for ear, eye, nose, and throat disorders
- Give care for nervous system disorders

Module Code and Title	<u>HLT NUR4 05 1224:</u> Non-communicable diseases
Nominal Duration:	126hrs
MODULE DESCRIPTION: This module aims to provide the trainees with the knowledge, skills and attitude required to improve the life style of the community that will enable to prevent and control of common non-communicable disease. It also describes effective community based rehabilitation (CBR) for the people with disabilities, early detection (screening), referral and follow up of cases.	
Training Outcomes At the end of the module the trainee will be able to attain the following training objectives: ➤ Prevent non-communicable diseases through provision of adequate information and education. ➤ Screen and refer clients requiring further investigation and management ➤ Follow up of common Non-communicable diseases cases and promote community based rehabilitation	

Module Contents:

Unit one: Prevention of non-communicable diseases

- 1.1. Approaches of Community diagnosis in non-communicable diseases
- 1.2. Identification of common non-communicable diseases
- 1.3. Prevention and control of common non-communicable Diseases

Unit Two: Screen and refer clients requiring further investigation and management

- 2.1. History taking and physical examination in common non-communicable Diseases
- 2.2. Managements of minor symptoms of non-communicable disease
- 2.3. Screening, counseling and referral of individuals with risk factors

Unit Three: Community based rehabilitation in non-communicable Diseases

- 3.1. Basic concept of disability
- 3.2. Community mobilization in care of people with disabilities
- 3.3. Provide Trainings to selected family members and community based organizations
- 3.4. Following cases per the feedback obtained from the health institution

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit one: Prevention of non-communicable diseases

- Describe approaches of community diagnosis in common non-communicable diseases
- Identify Cases of common non-communicable diseases through Community diagnosis
- Prepare plan and methods to resolve the identified cases
- Prepare IEC materials needed to provide education to the community on healthy life style and early detection of disease
- Report and follow Cases identified.

Unit Two: Screen and refer clients requiring further investigation and management

- Take pertinent history and do physical examination (P/E)
- Manage minor symptoms related to non-communicable disease
- Identify and counsel individuals with risk factors
- Refer Suspected Cases for further investigation and management

Unit Three: Community based rehabilitation in non-communicable Diseases

- Carry out community diagnosis based on the standard procedure
- Mobilize community for taking care of people with disabilities
- Conduct trainings for selected family members and community based organizations
- Follow cases as per the feedback obtained from the health institution

Module Code and Title	<u>HLT NUR4 06</u> 1224 :PRE, INTRA AND POST- OPERATIVE NURSING CARE
Nominal Duration:	107Hours
Module Description: This module aims to describes the knowledge, skills and attitude required to apply the practice of pre/post and intra operative nursing care, building upon existing skills to enable the enrolled nurse to provide holistic nursing care enrolled nurses use arrange of complex nursing interventions to assist client/s, and their significant others, to attain and maintain optimal health.	
Training Outcomes At the end of the module the trainee will be able to: • Teams in pre ,intra and post operative environment • Assessment of pre, intra and post-operative care • Plan of care in pre ,intra and post operative nursing • Pre ,intra and post operative Nursing Interventions • Evaluate pre ,intra and post operative nursing care	
Module Contents: Unit One: Team work in pre, intra and post operative environment 1.1. Operation theater and room design 1.2. Multi-disciplinary health care team 1.3. Care management frame work on operation room 1.4. Initial/emergency cares 1.5 Professional communication on operation team Unit Two: Assessment of pre, intra and post-operative care 2.1 Assess Nursing intervention 2.2 Holistic care of pre, intra and post operative 2.3 Documents pre, intra and post-operative care	

Unit Three: Care plan of Pre, intra and post operative environment

- 3.1. Develop Nursing care plan
- 3.2. Therapeutic nursing interventions
- 3.3. Assess pre, intra and post operative

Unit Four: Pre, Intra & Post operative Nursing care

- 4.1 . Pre, Intra & Post operative Nursing interventions
- 4.2 . Environmental hazards
- 4.3 Infection control
- 4.4 . Implement Preoperative diagnostic procedures
- 4.5. Medication administration (principles of anesthesia)

Unit Five: Evaluation of Pre, intra and post operative Nursing care

- 5.1. Evaluation of Nursing interventions
- 5.2. Assess medications and therapeutic regimes
- 5.3. Emergency treatment of Complication

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

LO1. Health care team in Pre ,intra and post operative environment

- Contribute multi-disciplinary health care team appropriately to support in managing care needs of client in the Pre ,intra and post operative environment
- Establish relationships with other member so the healthcare team
- Incorporate philosophical frame work for managing care into practice for the client in the pre/post and inters operative environment
- Recognize emergency service personnel, referring agencies and other hospital department staff are contributors to the initial/emergency care needs of the client in the Pre ,intra and post operative environment
- Maintain professional communication with all members are the Pre ,intra and post operative team

LO2. Assessment of pre, intra and post-operative care

- Assess clients, their significant to the and other health team members are communicate defectively for client undergoing surgical intervention
- Provide holistic client centered care in the Pre ,intra and post operative environment
- Identify any special needs documented for client Pre ,intra and post operative assessment

LO3. Pre, intra and post operative client care plan

- Develop an individualized plan of care for client in the pre, intra and post operative environment in conjunction with registered nurse/midwife/the client / health care team
- Registered nurse/ to ensure nursing care plan is participated with reflects specific nursing care requirements in accordance with health unit policy
- Registered nurse/ to ensure care plan is made participatory with reflects client's current nursing needs and nursing actions designed to maximize physical function and minimize potential complications
- Understand of risk management principles is demonstrated in planning client care
- Plan care and therapeutic interventions aim are confirmed to assist client/s to achieve optimal health outcomes
- Identify requirements of client (and identified significant other/s)
- Enhance health promotion and education to implement of nursing care plan
- Regular review of plan is carried out of care and, in conjunction with registered nurse, modify to reflect changes in client condition

LO4. Pre, Intra & Post-operative Nursing care

- Reprioritize nursing interventions according to client needs, in conjunction with registered nurse/
- Modify nursing interventions using critical thinking & problem solving approaches, to reflect changes in client condition
- Perform nursing interventions to assist client(and significant other/s)to meet expected outcomes of using care plan, including health promotion and/or education
- Maintain safe environment appropriately for the ages specific population
- Monitor nursing interventions to address client needs and revise the min consultation/collaboration with the health care team
- Recognize environmental hazards for advantage of every opportunity to reduce risk and promote safety
- Check equipment according to manufacturer commendations ,ensure proper functioning and take corrective action and report when faulty equipment and/or environmental hazards are detected
- Apply practice of infection control to all activities within the pre/post& ,applying a surgical conscience at all times in line with Ethiopian standards
- Undertake appropriate preoperative diagnostic procedures in line with organization

policies and procedures

- Implement appropriate pre, intra and post-operative surgical procedures in line with organization policies and procedures
- Ensure medication administration based on sound knowledge of principles of drug actions and side effect in accordance with health unit policies and procedures

LO5. Evaluation of Nursing intervention Pre, intra and post operative.

- Identify responses of client/s significant to nursing interventions, and document are evaluated in accordance with health unit policy and in conjunction with registered nurse
- Assess client understanding of their condition, medications and therapeutic regimes according to prior discharge/transfer
- The registered nurse, ensured health teaching and discharge planning are in corporate in to practice in line with established policies and procedures for discharge/transfer
- Evaluate emergency treatment and the client's response are reported and documented to effectiveness of nursing interventions

MODULE CODE & TITLE: HLT NUR4 M7 1224 :Maternal Health Care
NOMINAL DURATION: 212Hours
MODULE DESCRIPTION: This module aims to provide the trainees with the knowledge, skills and attitudes required by an enrolled nurse working in the area of providing care to mothers in arrange of settings, such as antenatal, labor and postnatal health care settings
LEARNING OUTCOMES At the end of the module the learner will be able to: • Provide care for pregnant mother • Provide care for Laboring mother • Provide care for postpartum mothers • provide care of the mother with gynecological problems
MODULE CONTENTS: Unit One: Pregnant mother care 1.1. Anatomy and physiology of female reproductive organ 1.2. Fertilization and implantation 1.3. Stages of fetal development 1.4. Fetal circulation 1.5. Physiologic changes of pregnancy 1.6. Terminology related with pregnancy 1.7. focused antenatal care

- 1.8. Assessing pregnant mother
- 1.9. Counseling pregnant mothers
- 1.10. Minor disorder of pregnancy
- 1.11. Common illness during pregnancy

Unit Two: care for Laboring mother

- 2.1. Physiology of labor
- 2.2. Stages of labor
- 2.3. Comforting laboring mothers
- 2.4. The Partograph
- 2.5. Management of labor in each stages
- 2.6. Newborn assessment
- 2.7. Nursing care of the newborn
- 2.8. Complicated labor
- 2.9. Instrumental delivers
- 2.10. Assisting mother with feeding to baby

Unit Three: Postpartum Care

- 3.1. Anatomic and Physiologic change of the puerperium
- 3.2. Lactation
- 3.3. Care of the mother during the post-partum period
- 3.4. Safe bathing, dressing, feeding of the newborn
- 3.5. Abnormal observations during the postpartum period

- 3.6. Emotional, spiritual and/or specific cultural needs of the postpartum mother
- 3.7. Immunization for the mother and the baby
- 3.8. Counseling and health education of postnatal mother
- 3.9. Contraception for postpartum mother

Unit Four: Gynecological Care

- 4.1. Female congenital anomalies
- 4.2. Menstrual disorders and menopause
- 4.3. Pelvic inflammatory diseases
- 4.4. Abortion
- 4.5. Ectopic pregnancy
- 4.6. Uterine prolapsed and inversion
- 4.7. Couples with Infertility
- 4.8. Obstetrics fistula
- 4.9. Cancer of the reproductive organ

Learning Methods:

- Interactive lecture
- Group discussion
- Demonstration
- Role play
- Simulation
- Group assignment
- Individual assignment

Assessment Methods: Continuous 70%, Final 30%

- Continuous assessments (quiz, assignment, tests etc.).
- Oral questioning

- Skill check out
- Final written exam

Assessment Criteria

Unit One: Pregnant mother care

- Anatomy and physiology of female reproductive organ described
- Fertilization and implantation discussed
- Stages of fetal development elaborated
- Fetal circulation explained
- Physiologic changes of pregnancy were elaborated
- Terminology related with pregnancy were discussed
- focused antenatal care were provided
- An assessment is practiced to the pregnant mother Counseling pregnant mothers
- Minor disorder of pregnancy is described
- Common illness during pregnancy is identified

Unit Two: care for Laboring mother

- Physiology of labor is described
- Stages of labor is elaborated
- The mother is assisted and supported with feeding to baby
- The Partograph is described
- Management of labor in each stages is described

- Newborn assessment is performed
- Nursing care of the newborn is performed
- Complicated labor is discussed
- Instrumental delivers is assisted
- Comfort measures for laboring mothers undertaken

Unit Three: Postpartum Care

- Anatomic and Physiologic change of the puerperium is identified
- Lactation is described
- Care of the mother during the post-partum period is performed
- Safe bathing, dressing, feeding of the newborn is assisted
- Abnormal observations during the postpartum period is identified and reported
- Emotional, spiritual and/or specific cultural needs of the postpartum mother is maintained
- Immunization for the mother and the baby is performed
- Counseling and health education of postnatal mother is conducted
- Contraception for postpartum mother identified and assisted

Unit Four: Gynecological Care

- Female congenital anomalies is described
- Menstrual disorders and menopause were described
- Pelvic inflammatory diseases is discussed
- Care of the mother who underwent abortion is conducted

- Ectopic pregnancy is explained
- Uterine prolapsed and inversion is described
- Couples with Infertility were advised
- Care of the mother with obstetrics fistula is conducted
- Care of the mother with cancer of the reproductive organ is undertaken

Module Code and Title	HLT NUR4 M08 1224 : Child Health Care
Nominal Duration:	214 Hours
Module Description: This module aims to provide the knowledge, attitude skills required by nurses working in the area of providing care to child, family and care giver.	
Training Outcomes At the end of the module the trainee will be able to: • Assess child growth and development • Assess child growth and development • Manage infant and child with nutritional problems • Manage common medical and surgical childhood health problems • Manage expanded programme of immunization • Manage childhood illness using IMNCI protocol	
Module Contents: Unit One: Child growth and development. 1.6. Basic concept of child health care 1.7. Child development and growth 1.8. Child developmental stages 1.9 Factors affecting growth and developments	

1.10 Growth monitoring

Unit Two: Infant and child with nutritional problems

- 2.6. History taking & physical examination in children
- 2.7. Components of history taking and physical examination
- 2.8. Emergency, Triage, Assessment and Treatment (ETAT)
- 2.9. Basic concept of malnutrition
- 2.10. Moderate and severe acute malnutrition
- 2.11. Feeding Infant and Young children

Unit Three: Common medical surgical childhood health problems

3.4 . Respiratory system Disorders

- 3.1.10 Tonsillitis
- 3.1.11 Croup syndrome
- 3.1.12 Bronchitis
- 3.1.13 Pulmonary Tb
- 3.1.14 Foreign body Aspiration
- 3.1.15 Bronchial Asthma

3.5 Gastrointestinal & metabolic problems

- 3.5.1 Intussusceptions & Volvulus
- 3.5.2 Hernia
- 3.5.3 Appendicitis
- 3.5.4 Diabetic mellitus
- 3.5.5 Iodine deficiency

3.6 Genitourinary system problems

- 3.6.1 UTI
- 3.6.2 Acute Glomerulonephritis
- 3.6.3 Nephritic syndrome
- 3.6.4 Hydrocele
- 3.6.5 Undescended testicles

- 3.6.6 Male circumcision
- 3.11. **Cardio vascular system disorders**
 - 3.11.1. Anaemia
 - 3.11.2. Cardiac failure
 - 3.11.3. Rheumatic heart disease
 - 3.11.4. Haemophilia
 - 3.11.5. Leukaemia
- 3.12. Muscular skeletal system problems
 - 3.12.1. Fracture
 - 3.12.2. Amputated child
 - 3.12.3. Osteomyelitis
- 3.13. **Nervous system problems**
 - 3.13.1. Convulsive disorder (seizure)
 - 3.13.2. Neonatal sepsis and Meningitis
 - 3.13.3. Paralysis
 - 3.13.4. Mental Retardation
- 3.14. **Infective diseases in children**
 - 3.7.1 Ophthalmic neonatorium
 - 3.7.2 Congenital syphilis
 - 3.7.3 Trachoma
 - 3.7.4 Conjunctivitis
- 3.15. **Common Vaccine preventable diseases**
 - 3.15.1. Measles
 - 3.15.2. Poliomyelitis
 - 3.15.3. Diphtheria
 - 3.15.4. Pertusis
 - 3.15.5. Tetanus
 - 3.15.6. Hepatitis .B viru
 - 3.15.7. Hemophilus Influenza
 - 3.15.8. Pneumococcal pneumonia
 - 3.15.9. Diarrhea
 - 3.15.10. Tuberculosis
- 3.16. Common congenital abnormalities

Unit Four: Expanded programme of immunization

- 4.1. Basic concept of EPI
- 4.2.Strategies of EPI
- 4.3.Types of immunization and vaccine
- 4.4.Target diseases of EPI in Ethiopia
- 4.5.Cold chain system
- 4.6.Calculating Target group /Eligible children, EPI coverage and dropout rate
- 4.7.Immunization schedule

Unit Five: IMNCI protocol

- 5.1. Describe IMNCI approach
- 5.2.Assess child hood illness according to current guide line
- 5.3.Classify child hood illness according to current guide line
- 5.4.Manage child hood illness according to current guide line
- 5.5. Perform charting, recording and reporting

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: Child growth and development.

- Describe basic concept of child development and growth
- Describe child developmental stage
- Elaborate theory of growth and developments
- List factors affecting growth and developments
- Describe Growth monitoring

Unit Two: Infant and child with nutritional problems

- Perform history taking & physical examination
- Perform Emergency, Triage, Assessment and Treatment (ETAT)
- Describe basic concept of malnutrition.
- Manage moderate and severe acute malnutrition
- Perform infant and young children feeding

Unit Three: Common medical surgical childhood health problems

- Differentiate common medical and surgical childhood problems
- Manage common respiratory problems
- Manage common gastrointestinal & metabolic problems
- Manage common genitourinary problems
- Manage common cardiovascular problems
- Manage common muscular skeletal system problems
- Manage common nervous system problems
- Manage common infectious diseases of children
- Manage Common vaccine preventable diseases

- Describe common congenital abnormalities

Unit Four: Expanded programme of immunization

- Describe concepts of EPI
- Explain strategies of EPI service
- Describe immunization and vaccine types
- Describe target diseases of EPI in Ethiopia
- Describe cold chain system
- Calculate Eligible children, EPI coverage and dropout rate
- Describe target age women in child bearing age, immunization campaign and scheduling

Unit Five: IMNCI protocol

- Describe IMNCI approach
- Assess child hood illness according to current guide line
- Classify child hood illness according to current guide line
- Manage child hood illness according to current guide line
- Perform charting, recording and reporting

Module Code and Title	<u>HLT NUR4 09 1224:</u> Nutrition and Dietary Service
Nominal Duration:	126hrs
MODULE DESCRIPTION: This module describes the knowledge, skills and attitude required to assess, screen, identify, plan and manage nutritional problems and provide dietary service in nursing practice.	
Training Outcomes At the end of the module the trainee will be able to attain the following training objectives: • Identify different elements of food • Assess nutritional requirements	

- Apply feeding infants and children
- Apply nutritional assessment and intervention

Module Contents:

Unit one: Nutrients and their Sources

- 1.1. Basics of food and nutrition
- 1.2. Classification, sources and function of essential nutrients
- 1.3. Nutritional standards

Unit Two: Assessments of nutritional requirements

- 2.4. Nutritional requirements
- 2.5. Factors affecting nutritional requirements
- 2.6. Malnutrition in Ethiopia

Unit Three: Infants and children feeding

- 3.7 Infants bottle feeding
- 3.8 . Nutritional requirements of infants and children
- 3.9 . Infant formula preparation and storage

Unit Four: Nutritional assessment and intervention

- 4.5 . Nutritional screening, diagnosis and classification of acute malnutrition
- 4.6 .Management of acute malnutrition with supplementary feeding
- 4.7 . Nutritional intervention

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Module Code and Title	<u>Code: HLT NUR4 M10 1224:</u> Mental health care
Nominal Duration:	87 Hours
Module Description: This module describes the performance outcomes, skills and knowledge required to contribute to the nursing care and treatment of a person with a mental health condition.	
Training Outcomes At the end of the module the trainee will be able to attain the following training objectives: • Identify Mental health legislation requirements • Respond to signs of mental health problem • Plan and conduct clinical observations • Determine recovery of a person with a mental health problem	
Module Contents: Unit one: Mental health legislation 1.1.Introduction to Mental health conditions 1.2.Key features of mental health 1.3.Values and philosophies of mental health care 1.4.Rights and dignity 1.5.Legal obligations of mental health care giver	

Unit two: Signs of mental health problem

- 2.1. Myth related to mental health
- 2.2. Signs and symptoms of Mental health disorders
- 2.3. Bio-psycho-social effects of mental conditions
- 2.4. Factors that impact mental conditions
- 2.5. Negotiation of person with a mental health condition

Unit three: Developing Care plan for the client with mental conditions

- 3.1. Steps of care plan developing
- 3.2. Risk assessment
- 3.3. Multidisciplinary health care team
- 3.4. changes to mental illness client's behavior
- 3.5. Mental Health promotion and educational strategies
- 3.6. Recovery principles to maximize mental health outcomes

Unit four : Contributions of health care team for recovery of a person

- 4.1. planning, prioritizing and implementing Nursing interventions
- 4.2. Respecting Person's dignity and uniqueness
- 4.3. Therapeutic interaction of care team
- 4.4. Medication administration effects
- 4.5. Community resources and opportunities
- 4.6. Supporting the person/client
- 4.7. Possible strategies to responded barriers to mental health promotion
- 4.8. Principles of contemporary, evidenced-based nursing practice

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: Mental health legislation requirements.

- Describe key features of mental health
- Identify mental Illness
- Explain values and philosophies of mental health care.
- Respect Rights and dignity of the person

Unit Two: Signs of mental health problem

- Describe Myth related to mental health
- Identify Mental health problems, and their signs and symptoms
 - Anxiety disorders
 - Anxiety related disorders
 - Schizophrenic disorder,
 - Eating disorders
 - Child abuse and Neglect
 - Personality disorders

Unit Three: care plan for mental health conditions

- Undertake risk assessment and plan care
- Build multidisciplinary health care team
- Apply Health promotion and education
- Maximize health care outcomes

Unit four: Recovery of a person mental health problem

- Respect dignity and uniqueness of care
- Participate others in therapeutic interaction
- Support valuable member of community affecters
- Design strategies responding to barriers

Module Code and Title	<u>Code</u> : HLT NUR4 1224 : Community Health Nursing
Nominal Duration:	71 Hours
Module Description: This module describes the knowledge, skills and attitude required to provide care for the community in line with the needs of prevention & control of diseases in Accomplishing organizational activities relating to its coverage.	
Training Outcomes At the end of the module the trainee will be able to: • Establish Professional relationship in health team & community. • Adhere with Privacy and confidential to rural health service environment. • Conduct Health care teaching • Provide Physical & psychological safe environment	
Module Contents: Unit One: Professional relationship in health team & community. 1.1.Community health nursing 1.2.Goals and Responsibilities of nurse 1.3.Importance of Community involvement	

1.4. Socio cultural and behavior needs of community

1.5. Quality health care

Unit two: Privacy and confidential to rural health service environment.

2.1. Working relationship in the community

2.2. Community health assessment

2.3. Community health diagnosis

2.4. Community health planning

2.5. Community health implementation

2.6. Community health Evaluation

Unit three: Health care teaching

3.1. Home health services

3.2. Home visiting

3.3. Cultural diversity in the family

3.4. Risk factors affecting family health

3.5. Preventive, promoting and rehabilitative nursing care for the family

Unit four. Physical & psychological safe environment

4.1. Health service to the community

4.2. School health service

4.3. Basic prison health service

4.4. Basic Occupational health service

4.5. Health education in the community

4.6. Safety & accident prevention

- 4.7.Environmental health
- 4.8.Community waste treatment system
- 4.9.Sanitation programmers
- 4.10. Food and drink establishment

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice

Assessment Criteria:

Module Contents:

Unit One: General principles of diseases prevention and control.

- Define community health nursing
- Describe community and institutional health
- Identify goals and Responsibilities of nurse
- Identify importance of Community involvement
- Identify socio cultural and behavior needs of community
- Define quality health care

Unit two: Privacy and confidential to rural health service environment.

- Maintain working relationship in the community
- Assess health & nursing situation in the community
- Formulate community diagnosis

- Set goal for community health nursing
- Implement nursing process for prevention level of diseases
- Evaluate nursing process in the community

Unit three: Health care teaching

- Organize & provide Basic nursing care at home
- Conduct family assessment during Home visit
- Identify cultural diversity in the family
- Identify and implement risk factors affecting family health
- Provide preventive, promoting and rehabilitative nursing care for the family

Unit four. Physical & psychological safe environment

- Organize & provide health service to the community
- Identify and provide School health service
- Identify and provide Basic prison health service
- Identify and provide Basic Occupational health service
- Provide health education in the community
- Perform safety & accident prevention
- Maintain environmental health
- Establish community waste treatment system
- Maintain sanitation programs
- Assess Food and drink establishment

Module Code and Title	HLT NUR4 M12 1224 : <u>Community Health Service management</u>
Nominal Duration	100 Hrs.
Module Description This module covers the knowledge, skills and attitude required to manage health service of the area to improve quality of service. It describes the organizational guidelines to be utilized in health care delivery, existing health policies and the structure, function as well as the management of the health system. It further discusses the strategies in building individual's and team capacity that enable to maximize the health service coverage and quality.	
Training outcomes At the end of the module the learner will be able to: • Follow organizational guidelines, understand health policy and service delivery system • Plan, manage, monitor and evaluate health system • Lead and build individual's and team's capacity	
Module contents Unit One: Health policy and service delivery system 1.1. Policy and organization of the health care system 1.2. Primary healthcare	

- 1.3. Health Service Extension Program
- 1.4. Workplace instructions and policies
- 1.5. Organizational programs and procedures
- 1.6. Organizational resources
- 1.7. Principles Of Management
- 1.8. Leadership in Nursing

Unit Two: Management functions

- 2.1.management skills
- 2.2.Components of management functions
- 2.3.Resources Management
- 2.4.Team capacity
- 2.5.Conflict management
- 2.6. Health service monitoring

Unit Three: Team building

- 3.1.Self- improvement areas
- 3.2.Goals and objectives
- 3.3.Development needs
- 3.4.Team mentoring
- 3.5.Action plan preparation
- 3.6.Duties and responsibilities
- 3.7.Collaborative efforts
- 3.8. Feedback mechanism

Learning Methods:

- Lecture

- Group discussion
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Presentation

Assessment Criteria:

Unit One Health policy and service delivery system

- 1.1. Describe Policy and organization of the health care system
- 1.2. Discuss Primary healthcare
- 1.3. Discuss Health Service Extension Program
- 1.4. Identify Workplace instructions and policies
- 1.5. Identify Organizational programs and procedures
- 1.6. Describe Organizational resources
- 1.7. Discuss Principles Of Management

Unit Two: Management functions

- 2.1. Demonstrate management skills
- 2.2. Describe Components of management functions
- 2.3. Discuss Resources Management
- 2.4. Describe Team capacity

2.5. Discuss Conflict management

Unit Three: Team building

3.1. Identify Self- improvement areas

3.2. Describe Goals and objectives

3.3. Identify Development needs

3.4. Perform Team mentoring

3.5. Develop Action plan

3.6. Describe Duties and responsibilities

3.7. Discuss Collaborative efforts

3.8. Discuss Feedback mechanism

Module Code and Title	<u>HLT NUR4 13 1222:</u> MUDA
Nominal Duration:	56 Hours
MODULE DESCRIPTION: This module covers the knowledge, skills and attitude required by a worker to prevent and eliminate MUDA/wastes in his/her workplace by applying scientific problem-solving techniques and tools to enhance quality, productivity and other kaizen elements on continual basis. It covers responsibility for the day-to-day operation of the work and ensures Kaizen Elements are continuously improved and institutionalized	
Training Outcomes At the end of the module the trainee will be able to attain the following training objectives: • Work Preparation • MUDA • Causes of MUDA • Effectiveness of MUDA Elimination • MUDA Prevention	
Module Contents: Unit one: Prepare for work 1.1 Work instructions	

1.2 Reading and interpreting Job specification

1.3 OHS requirements

1.4 Selecting appropriate material

1.5 Safety equipment and tools

Unit Two: Identify MUDA and problem

2.1 Preparing and implementing Plan of MUDA.

2.2 Causes and effects of MUDA.

2.3 Tools and techniques to draw & analyze current situation.

2.4 Identifying and measuring waste/MUDA.

2.5 Relevant procedures of identifying & measuring MUDA

2.6 Reporting Identified and measured wastes

Unit Three: Analyze causes of a problem

3.1 Listing possible case of the problems.

3.2 Analyzing Cause relationships using 4M1E.

3.3 Identifying Causes of the problems

3.4 Select the root cause

3.5 Listing all possible ways to eliminate the most critical root cause

3.6 Testing and evaluating the solutions

3.7 Action plan summaries.

Unit Four: Eliminate MUDA and Assess effectiveness of the solution

4.1 Preparing and implementing elimination plan of MUDA

4.2 Necessary attitude to eliminate MUDA

- 4.3 The ten basic principles to eliminate MUDA
- 4.4 Tools and techniques to eliminate wastes/MUDA.
- 4.5 Reducing and eliminating Wastes/MUDA.
- 4.6 Reporting Improvements.

Unit Five: Prevent occurrence of wastes and sustain operation

- 5.1. Preparing and implementing prevention plan of MUDA.
- 5.2. Discussing and preparing standards for Machines Operations
- 5.3. Defining normal and abnormal conditions.
- 5.4. Clerical procedures and procurement.
- 5.5. Visual and auditory control methods.
- 5.6. Using *5W and 1H* sheet for waste-free workplace
- 5.7. Doing completion of required operation.
- 5.8. Updating of standard procedures and practices.

Ensuring capability of the work team

Learning Methods:

- Lecture
- Group discussion
- Demonstration
- Simulation
- Role playing
- Case study
- Problem based learning
- Field visit
- Brainstorming

Assessment Methods:

- Written test
- Oral questioning
- Practical demonstration
- Presentation
- Project work vs Product evaluation
- Observation in prepared checklist
- Objective structured clinical examination
- Direct observed practice
